¹ The ongoing charges reflect the total expenses charged to the result, divided by the average net asset value. For the calculation of the average net asset value, each published computation of the net asset value is taken into account. The ongoing charges are calculated over the twelve-month period ending at the end of the reporting period.

² Triodos Sterling Bond Impact Fund was launched on 30 October 2020. Ongoing charges 2020 are based on best estimates.

³ This share class was (re-)launched during the reporting year in question. Ongoing charges of that year are based on best estimates.

⁴ As from 1 January 2022, the British pound-denominated “K-Institutional” share classes of Triodos Pioneer Impact Fund have been renamed into “K-Institutional-II”. These renamed share classes have the same terms as an “I-II” share class.

⁵ Triodos Future Generations Fund was launched on 31 March 2022. Ongoing charges 2022 are based on best estimates.

General information

Legal structure

Triodos SICAV I (the fund) is an open-ended investment company, incorporated in 2006 under the laws of the Grand Duchy of Luxembourg as a “Société d’Investissement à Capital Variable” (SICAV) in the form of a “société anonyme” for an unlimited period. Triodos SICAV I is governed by the law of the Grand Duchy of Luxembourg of 10 August 1915 on commercial companies, as amended, and by part I of the law of 17 December 2010 on Undertakings for Collective Investment, as amended. The fund merged in 2010 with Triodos Meerwaardefonds N.V., a Dutch investment company incorporated in 1997 and consisting of three sub-funds. Triodos SICAV I, including its sub-funds, is supervised by the Luxembourg regulator, the Commission de Surveillance du Secteur Financier (CSSF). The registered office of Triodos SICAV I is established at 11-13, Boulevard de la Foire, L-1528 Luxembourg.

Triodos SICAV I is structured as an umbrella fund, which provides investors access to a variety of sub-funds.

As at 31 December 2022, Triodos SICAV I offers the following sub-funds:

- **Triodos Euro Bond Impact Fund** (launched on 16 July 2007);
- **Triodos Global Equities Impact Fund** (launched on 16 July 2007);
- **Triodos Sterling Bond Impact Fund** (launched on 30 October 2020);
- **Triodos Impact Mixed Fund – Defensive** (launched on 21 June 2019);
- **Triodos Impact Mixed Fund – Neutral** (launched on 25 June 2010);
- **Triodos Impact Mixed Fund – Offensive** (launched on 21 June 2019);
- **Triodos Pioneer Impact Fund** (launched on 12 March 2007); and
- **Triodos Future Generations Fund** (launched on 31 March 2022)

Management company

Triodos SICAV I has appointed Triodos Investment Management B.V. (Triodos Investment Management) as the authorised UCITS management company (Management Company) of Triodos SICAV I. Triodos Investment Management is incorporated under the laws of the Netherlands and is a wholly-owned subsidiary of Triodos Bank N.V. (Triodos Bank). Triodos Investment Management is supervised by the Dutch regulator, Autoriteit Financiële Markten (AFM).

The Management Board of Triodos Investment Management consists of:
Dirk Jan van Ommeren (Chair)
Kor Bosscher
Hadewych Kuiper (since 1 February 2022)

Investment manager

Triodos Investment Management is the investment manager of the fund. Triodos Investment Management has appointed:

- Jeroen van Herwaarden as Fund Manager of Triodos Euro Bond Impact Fund;
- Arjan Palthe as Fund Manager of Triodos Global Equities Impact Fund¹ (as from 1 February 2022);
- Rosl Veltmeijer as Fund Manager of Triodos Sterling Bond Impact Fund² (as from 1 January 2023);
- Rob van Boeijen as Fund Manager of Triodos Impact Mixed Fund (Defensive – Neutral – Offensive);
- Dimitri Willems as Fund Manager of Triodos Pioneer Impact Fund^{1,3} (as from 15 August 2022); and
- Sjoerd Rozing as Fund Manager of Triodos Future Generations Fund.

Depositary and paying agent, domiciliary, corporate and administrative agent, registrar and transfer agent

RBC Investor Services Bank S.A. (RBC Investor Services Bank) acts as depositary, paying agent, domiciliary, corporate and administrative agent, and registrar and transfer agent for Triodos SICAV I.

¹ Dirk Hoozemans was Fund Manager of Triodos Pioneer Impact Fund until 30 June 2022 and Fund Manager of Triodos Global Equities Impact Fund a.i. in January 2022.

² William de Vries was Fund Manager of Triodos Sterling Bond Impact Fund until 31 December 2022.

³ Sjoerd Rozing was Fund Manager of Triodos Pioneer Impact Fund a.i. from July 2022 until 14 August 2022.

Report of the Board of Directors

The Board of Directors of Triodos SICAV I is responsible for Triodos SICAV I and each of its sub-funds. The Board aims to protect the interests of investors, for example by overseeing the implementation of the defined strategy of each sub-fund, and by overseeing the Management Company, the service providers and the audit process.

Board composition

In 2022, there were no changes to the composition of the Board of Directors. As at 31 December 2022, the Board of Directors consisted of:

Director	Qualification	Appointed in
Garry Pieters*	Independent director, Class P director	2015
Monique Bachner-Bout	Independent director	2016
Dirk Jan van Ommeren	Class P director	2016
Jeroen Smakman	Class P director	2020
Jane Wilkinson	Independent director	2021

* Chair of the Board since 24 June 2016

Biographies of the Directors are included in the chapter “Management and Administration”.

Board committees

The Board of Directors does not currently consider it necessary to create committees.

Board meetings

The Board of Directors meets at least four times a year. Additional meetings are arranged when necessary. The Board also uses written resolutions where appropriate.

In 2022, five regular Board meetings were held, attended by all Board members. At one meeting, one Board member was represented by proxy. At each regular Board meeting, the Management Company reports on various topics, amongst others, the state of affairs of the sub-funds, anti-money laundering and ‘know your customer’ matters, regulatory changes, marketing and sales activities, investment compliance monitoring and risk management.

Prospectus

In 2022, the prospectus of Triodos SICAV I was amended three times. These modifications did not change the risk profiles of any of the sub-funds.

The prospectus was updated with effect from 10 March 2022 for the launch of a new sub-fund, Triodos Future Generations Fund.

The prospectus was updated again with effect from September 2022. The prospectus was thoroughly restructured, rewritten, and redesigned, with the goal of making it more user-friendly. There were no changes to the investments themselves, with the exception of the clarification of the investment policy of Triodos Pioneer Impact Fund, the increase of the management fee for certain share classes, the change of benchmark for certain sub-funds and the clarification of diversification requirements.

In December 2022, the prospectus was amended to incorporate necessary disclosures to comply with the Delegated Regulation supplementing the Sustainable Finance Disclosures Regulation (SFDR) pursuant to which the sub-funds of Triodos SICAV I qualify as article 9 products in the meaning of SFDR, having sustainable investments as their investment objective.

Conflicts of interest

At each Board meeting, the Directors declare whether there are conflicts of interest regarding agenda items.

A Director who has conflicts of interest relating to an agenda item will declare such conflicts and abstain from the discussion and voting on any decisions relating to that agenda item.

The Board also monitors potential conflicts by maintaining a conflicts of interest register.

Board remuneration

According to the remuneration policy of Triodos SICAV I, each of the Directors not employed by the Triodos Group, is paid an equal fixed annual remuneration, with the Board Chair receiving an additional fixed amount. The Board believes the remuneration of the Board reflects its responsibilities and experience and is fair given the size and complexity of Triodos SICAV I. The remuneration of the Directors is approved annually by the shareholders at the Annual General Meeting of shareholders.

Annual General Meeting of shareholders

The Annual General Meeting of shareholders (the Meeting) was held in Luxembourg on 28 April 2022. During this meeting, the shareholders:

- took notice and acknowledged the management report of the Board of Directors and the report of the auditor for the financial year ending 31 December 2021;
- approved the audited statements of assets and liabilities and the statement of operations for the financial year ending 31 December 2021;
- approved the allocation of the net results for the financial year ending 31 December 2021;
- granted full discharge to the members of the Board of Directors with respect to their performance of duties for all or part of the financial year ending 31 December 2021;
- re-elected Monique Bachner-Bout as Independent and Non-Class P Director to serve for a period of four years ending on the date of the Meeting to be held in 2026;
- re-elected PricewaterhouseCoopers Luxembourg as the auditor to serve for the financial year ending 31 December 2022; and
- approved the remuneration of Directors for the financial year ending 31 December 2022.

Complaints handling

Triodos SICAV I has a complaints handling policy to ensure proper handling of complaints as and when they may arise. Triodos SICAV I has appointed a Complaints Handling Officer, who is responsible for implementation of the complaints handling policy.

The complaints handling policy, as updated in November 2022, is available upon request and on www.triodos-im.com.

Complaints can be submitted in writing to:
Triodos SICAV I
Attention: Complaints Handling Officer
11-13, Boulevard de la Foire
L-1528 Luxembourg
Grand Duchy of Luxembourg
E-mail address: TriodosIM@triodos.com

During 2022, the Complaints Handling Officer did not receive any complaints addressed to Triodos SICAV I.

Best practices

The Board of Directors aspires to best practices and good governance. For example, the Board has made efforts to ensure the diversity of its members, in terms of gender, complementary experience and expertise, and a good representation of independent Directors. The Board of Directors conducts periodic self-assessments in which it reflects on its performance and strategy.

The Board of Directors adheres to the principles of the ALFI Code of Conduct and monitors its application.

Luxembourg, 5 April 2023

Report of the Management Company

The fund invests in companies and bonds that are listed on stock and bond exchanges and that have a positive impact by contributing to the transition to a more sustainable society. In some instances, the fund may also invest in regular sovereign and sub-sovereign bonds. Investments in the fund address seven sustainable transition themes that contribute to solving global challenges posed by structural trends such as ageing populations, resource scarcity, inequality and social exclusion.

Each sub-fund has its own specific risk-return profile, applies a long-term strategy and has a concentrated but well-diversified portfolio.

Impact investment approach

The sub-funds have sustainable investments as their objective as defined in article 9 of the SFDR. The sustainability-related information for each sub-fund is available in the annexes in section “Sustainability-related disclosures” of the annual report.

The sub-funds distinguish themselves by their mandates, strict principles and active dialogue with companies. The investment process starts with a long-term vision for the transition towards a more sustainable society. The fund invests in companies that contribute to the progress of seven transition themes:

- Sustainable Food and Agriculture;
- Sustainable Mobility and Infrastructure;
- Renewable Resources;
- Circular Economy;
- Social Inclusion and Empowerment;
- Innovation for Sustainability; and
- Prosperous and Healthy People.

These transition themes are the cornerstone of the fund's stock selection process, as each company and/or issuer that is included in the portfolio must make a positive contribution to one or more of these themes through its commercial propositions. In addition, all investments must meet the strict Triodos group-wide minimum standards.

The fund invests in order to achieve positive change - as well as a financial return that is in line with the broader market and is realised at market-aligned risk levels - using disciplined investment criteria and a fully integrated investment and stewardship approach.

In addition to the information provided in this annual report, an annual impact report will be published in the first half of 2023 that provides a more extensive overview

of the fund's positive impact in 2022. This report, as well as regular updates, will be available on www.triodos-im.com.

Macroeconomic developments

In 2022, global economic activity expanded at a rate below the long-term average, but considering everything that happened during the year, the expansion was still relatively robust. Since the start of the year, the global economy had to deal with surging inflation caused by the COVID-19 pandemic. Several COVID-lockdowns had created an imbalance between supply and demand, which was amplified by the huge fiscal support across advanced economies. This problem was aggravated when the global economy was dealt another blow early in the year, as Russia invaded Ukraine. Western sanctions and Russian retaliation led to surging commodity prices, supply chain disruptions and declining household and business confidence. On top of that, ongoing COVID-related lockdowns in China continued to disrupt global supply chains.

However, global activity was supported by post-COVID re-opening of advanced economies in the first half of the year. Consumption rose sharply as restrictions were removed and pent-up demand was released. Even when the re-opening effects faded, consumption remained relatively robust despite continued elevated inflation, as exceptionally strong labour markets provided job security, and excess savings built up during lockdown periods provided sizable buffers. Companies seemed to have sufficient pricing power to pass on inflationary pressures and maintain healthy margins. Still, many lower-income households fell into poverty as they were confronted with the severe cost-of-living squeeze.

Highly elevated inflation forced most major central banks to tighten their monetary policies rapidly and aggressively. The Federal Reserve (Fed) and Bank of England (BoE) already started hiking their policy interest rates in the first half of the year, while the European Central Bank (ECB) implemented its first policy rate increase in the third quarter. In total, the Fed hiked by 425bps, the BoE by 340bps and the ECB by 250bps. In the last month of 2022, the Bank of Japan, which until then had stayed well away from any tightening moves, surprisingly adjusted its yield curve control policy, which by some was interpreted as a first step towards tighter monetary policy. Higher interest rates across most major advanced economies almost immediately cooled down the housing markets, as mortgage rate rose significantly.

As a logical consequence, recession fears grew in all major advanced economies, as they faced the toxic

cocktail of elevated inflation and global monetary tightening. The US experienced a technical recession in the first half of the year, but this downturn was not classified as an official recession due to strong consumer spending and a tight labour market. In the second half of the year, US consumption remained robust, partly supported by US inflation peaking during the summer and gradually falling in the subsequent months (though staying well above the 2% central bank target). The US was also relatively shielded from the war-induced energy price rises, being a net energy exporter.

In that respect, Europe, as a net energy importer and heavily reliant on Russian gas supply, was far more impacted by the war. Russian energy supply cuts and European import bans forced European countries to buy from other energy suppliers while energy prices were soaring. This obviously depressed economic activity. The UK entered recessionary territory in the third quarter of 2022, as it simultaneously continued to struggle with the consequences of Brexit. The eurozone followed suit in the final quarter of the year. Both recessions appeared to be relatively mild, however with tight labour markets and sizable fiscal support providing a cushion. Even though Japan is also a net energy importer, its more limited dependence on Russian fossil fuels, more muted inflation dynamics and its delayed COVID re-opening prevented the country from falling into a recession. In addition, fiscal support throughout the year across advanced economies supported consumption.

Meanwhile, China's zero-tolerance COVID policy and the liquidity crisis in the Chinese property sector also weighed on global economic activity. This triggered the People's Bank of China to modestly ease its monetary policy, going against the global tightening move. Towards the end of the year, the Chinese authorities suddenly ended their zero-tolerance COVID policy following rare protests across the country.

Sadly, the strengthening economic headwinds in 2022 mostly resulted in policy choices that directly opposed achieving the world's Sustainable Development Goals (SDGs). To partially compensate for the loss of household purchasing power, governments mostly implemented generalised measures that lowered the price of electricity and gas for everyone. This goes directly against the goal of addressing inequality, as such measures equally favour higher-income households, which have more buffers to cope with these price increases. As a result, energy poverty increased in advanced economies. In addition, (potential) energy shortages led to the re-opening of coal-fired powerplants in Europe. Such measures clearly do not incentivise a reduction in fossil fuel-related energy consumption and are therefore not in line with carbon emissions reduction targets. The United Nations climate

summit (COP27) in November also failed to deliver any significant pledges to cut greenhouse gas emissions faster, although it did lead to a historic commitment by richer countries to help pay for climate-related damage suffered by poorer countries.

During the year, war-induced soaring food prices and physical supply disruptions also increased food insecurity in a number of developing countries. Increasing geopolitical tensions, especially between the US and China, also made it harder to find a common ground when trying to address existential threats such as climate change and biodiversity loss. Reshoring efforts gained traction in 2022, which threatened to undermine the positive effects of globalisation. And the war in Ukraine continued to cause pain and suffering for millions of people, as fighting continued throughout the year. A glimmer of hope was provided by the acceleration of the energy transition in Western countries in response to the war in Ukraine.

Market developments

Global equity markets fell sharply in 2022. At first, this was related to worries about stagflation, i.e., high inflation combined with low economic growth. Investors feared that central banks would be unable to tame inflation, which would mean a prolonged period of elevated inflation that would slow consumer spending and business investment. The policy pivot made by most major central banks also contributed to falling equity markets, as it signalled the end of the favourable monetary conditions (low interest rates, abundant liquidity) that had driven equity markets to record highs all through the end of last year.

Central banks reclaimed their credibility with more aggressive communication and measures, but this only resulted in investor sentiment becoming dominated by recession fears instead of inflation concerns. Investors started to question central bank claims that inflation could be brought under control without causing a recession. Consequently, the perception of increased recession risks extended the downward momentum in equity markets. During the summer and in the final quarter of the year, global equity markets staged a partial recovery, fuelled by investor hopes that central bankers would not tighten as much as they had signalled. However, these hopes were crushed during the final central bank policy meetings in December when policymakers made it crystal clear that the end of the rate hiking cycle was not yet in sight.

On a regional level, annual equity returns were worst in the United States, both in local currency and euro

terms. This makes sense, as the US market is dominated by several big tech companies, which had previously benefitted from low interest rates and work-from-home promoting lockdowns, but in 2022 were hurt by a reversal of these trends. In Europe, the UK equity market outperformed its peers, as energy stocks and financials did well, benefitting from surging commodity prices and rising interest rates. In general, value outperformed growth in 2022, as economic conditions were favourable for defensive sectors such as utilities, consumer staples and health care.

Global bond markets also generated negative returns in 2022, which was remarkable as equity and bond markets usually do not move in tandem. Bond yields rose sharply on the back of stubbornly high inflation and increasingly aggressive monetary tightening. Both the US and German government bond yield curves inverted as the year progressed, as highly aggressive central bank tightening pushed up the short end while the long end was increasingly susceptible to recession fears. Corporate bonds slightly outperformed sovereign bonds, as credit spreads remained tighter.

Triodos Euro Bond Impact Fund

Investment strategy

Global bond markets generated deeply negative returns in 2022. Bond yields rose sharply as central banks responded to record high inflation with aggressive monetary tightening. Corporate bonds outperformed sovereign bonds despite significantly wider credit spreads. The sub-fund remained defensively positioned, with a broadly neutral duration. After the benchmark change as per 1 September 2022, the duration was shortened in order to adapt to the shorter benchmark duration but remained overweight. The sub-fund maintained its overweight position in high-quality bonds. The focus remained on increasing positive impact by selecting bond issuers and impact bonds that make a clear contribution to at least one of the seven Triodos transition themes. In line with this strategy, the sub-fund does not hold any positions in regular sovereign bonds.

In 2022, two bond issuers were removed from the portfolio, whereas nine new bond issuers were added. Nationwide and Carrefour were removed, as the funds that were released by the redemption of their bonds were reinvested in different issuers. Most additions were within the Sustainable Mobility and Infrastructure theme, with investments in green bonds issued by Réseau de Transport d'Électricité (RTE) and in Ferrovie dello Stato Italiane, and the inaugural green bond issued by the Republic of Austria. In addition, the sub-fund invested in a sustainability bond issued by Aedifica which has been labelled as a social bond, and in a corporate bond from Continental. Within the Prosperous and Healthy People theme, two additions were made by investing in corporate bonds issued by Coloplast and EssilorLuxottica. Contributing to the Renewable Resources theme, the sub-fund invested in green bonds issued by Suez and Statkraft.

Performance

In 2022, the total net assets of Triodos Euro Bond Impact Fund decreased from EUR 392.2 million to EUR 310.5 million. During this period, the return of the sub-fund (Z-Dis) was -17.1% (net of fees, including reinvestment of dividends), while the benchmark yielded -15.4%.

The relative performance of the sub-fund was negatively impacted by the longer duration which resulted in a negative curve change effect. The defensive allocation, with an underweight position in corporates and an overweight position in government-related bonds compared to the benchmark, resulted in a negative allocation effect. The selection effect and curve carry contribution were both neutral on a portfolio level.

Triodos Global Equities Impact Fund

Investment strategy

Equity markets were in risk-off mode for a major part of the year. The escalation of the conflict between Russia and Ukraine was a negative trigger. In addition, aggressive central bankers scared investors. They feared that central banks would go too far in hiking interest rates, as the fight against inflation was prioritised over economic growth. Given the significant declines of equity markets, investors were beginning to price in a recession, starting in Europe. Although the declines were widespread from a regional perspective, there was no panic selling, as the VIX Index registered only a moderate increase.

In the last quarter of the year, equity markets recovered somewhat. Investors were looking for signs that inflation was peaking and that economies were slowing. In this respect, weak macro-economic data was good news for equity investors as this confirmed that the central bank actions were working and would ultimately result in lower interest rates. Another positive factor for sentiment that emerged at the end of the year were signs that Beijing was easing its lockdown restrictions after a wave of unrest.

During 2022, the sub-fund sold its positions in amongst others Philips, Walt Disney, Kuraray and Adecco. New to the portfolio were Royal DSM, Advanced Drainage, EssilorLuxottica and Nvidia.

Performance

In 2022, the total net assets of Triodos Global Equities Impact Fund decreased from EUR 1.1 billion to EUR 1.0 billion. During this period, the return of the sub-fund (Z-Dis) was -15.5% (net of fees, including reinvestment of dividends), while the benchmark yielded -13.0%.

The performance of the sub-fund lagged the reference index. For the largest part this was due to currency effects. The strengthening of the US dollar versus the euro was not helpful as the sub-fund had less exposure to US companies compared to the benchmark.

Sector allocation effects were also negative, due to the underweight positions in Oil & Gas and Financials. The positive selection effect could not fully compensate for this. The sub-fund's holdings in the Prosperous & Healthy People theme (Novo Nordisk, Elevance, EssilorLuxottica) were beneficial for the performance. In the Utilities sector, Acciona Energías Renovables was among the best performing stocks in the sub-fund.

Triodos Sterling Bond Impact Fund

Investment strategy

The global rise in bond yields also affected the UK Sterling bond market. In order to fight inflation, the Bank of England raised the Official Bank Rate from 0.25% to 3.5% in 2022 and a few more rate hikes are pencilled in. Driven by this monetary tightening, the 10-year UK gilt benchmark yield rose from almost 1% to close to 3.7%. Overall, yields in the UK bond market were quite volatile, particularly in the second half of the year, which was marked by great political and macro-economic uncertainties related to the coming and going of prime minister Liz Truss. During the year, the sub-fund maintained a duration position close to the benchmark. However, as the UK economy entered recessionary territory in the fourth quarter and it was expected that longer-term yields would be lower by mid 2023 reflecting the gloomy growth expectations, the sub-fund adjusted the duration in November to take advantage of this development.

Within the portfolio, the number of positions and the allocation to corporate bonds with a positive impact were increased, while the allocation to UK gilts was reduced. The sub-fund added new issuers to the portfolio, including Henkel (Prosperous and Healthy People), Deutsche Telekom (Social Inclusion and Empowerment), Segro (Sustainable Mobility and Infrastructure) and Severn Trent (Renewable Resources). With the inclusion of Landwirtschaftliche Rentenbank a new transition theme was added to the portfolio, Sustainable Food and Agriculture. The bank operates as a government development bank providing refinancing for agriculture and rural areas.

Performance

In 2022, the total net assets of Triodos Sterling Bond Impact Fund grew from GBP 12.3 million to GBP 15.7 million. During this period, the return of the sub-fund (KR-Cap) was -12.3% (net of fees), while the benchmark yielded -11.7%.

This relative underperformance was mainly caused by a negative allocation effect. The sub-fund was underweight UK Gilts which performed relatively well and overweight government-related bonds which performed relatively poorly. The selection effect was positive due to an overweight position in higher quality corporate and government-related bonds as credit spreads widened driven by the negative market sentiment.

Triodos Impact Mixed Fund (TIMF) – Defensive, Neutral, Offensive (the Mixed sub-funds)

Investment strategy

The war in Ukraine triggered inflationary pressures and unprecedented restrictive monetary policies in Europe and the US. A series of interest rate hikes pushed capital markets down but did not convince investors that inflation was back under control. Bond yields moved up sharply and pushed equity valuations lower. The global economy and company earnings still showed some growth as consumer spending was supported by high levels of employment and spending of savings accumulated during COVID. Both equities and bonds posted double-digit negative returns for the calendar year - a rare phenomenon for balanced investment funds.

The Mixed sub-funds traded a significant number of holdings in order to improve the impact and high-conviction investment style. Sixteen smaller or low-conviction equity holdings were sold: Fancl, Philips, Kuraray, Sekisui Chemical, Fresenius Medical Care, Adecco, Starbucks, Yamaha, Ulvac, Demant, Telenor, International Paper, Disney, Paypal, Cognizant and VF Corp. The proceeds were reinvested in KLA (semiconductor equipment), Akamai (internet hardware and services), Shimano (bicycle parts), Nvidia (processors and software), Royal DSM (ingredients), EssilorLuxottica (eyewear), Sonova (hearing equipment), Adyen (on-line payments), Mastercard (payment systems) and Ebay (trading platform). These new positions are aligned with the impact criteria of Triodos and generally have high-quality financial profiles.

The Mixed sub-funds maintained their defensive approach, with an overweight position in high-quality bonds. During the last few months of the calendar year, the sub-funds were managed to a higher duration versus the adjusted benchmark. The benchmark duration was lowered for better alignment with client risk profiles. The sub-funds lowered their duration only partially as the interest rate view changed as well.

The sub-funds continued to exchange regular government bonds for impact government(-related) bonds. At year-end, all fixed income investments of the Mixed sub-funds were thematic and in line with a least one of the seven Triodos transition themes.

The sub-funds invested in new issuers or new bonds from existing issuers. New additions included RTE (French electricity grid), Royal DSM (ingredients), Aedifica (housing), Kuntarahoitus (Finland) impact bond, Coloplast (medical equipment), ALD green bond (leasing fleet), EssilorLuxottica (eyewear), Cades (French social institution), Suez (environmental services), Ferrovie dello Stato Italiane (Italian railways), ICO (Spanish social institution), EU social bonds, Madrid green bond, Statkraft (renewable energy), Continental (energy efficiency) and green bonds issued by the governments of France, Austria and Germany.

Performance Triodos Impact Mixed Fund – Defensive

In 2022, the total net assets of Triodos Impact Mixed Fund – Defensive decreased from EUR 45.7 million to EUR 36.8 million. During this period, the return of the sub-fund (Z-Dis) was -16.7% (net of fees, including reinvestment of dividends), while the benchmark yielded -14.7%.

The relative performance of the equity investments of Triodos Impact Mixed Fund – Defensive was negatively impacted by strong currency movements (appreciation of the US dollar and weakening of the Yen) and the sector allocation (no exposure in the sub-fund to fossil energy, which posted a stellar performance). The stock selection was a clear positive, owing to the sub-fund's focus on high-quality equities.

The bond investments for the sub-fund lagged their benchmark as the slightly longer duration in the last quarter of the year increased their sensitivity for the higher rates at year-end.

The tactical asset allocation had a small positive impact, as Triodos Impact Mixed Fund – Defensive was underweight equities during the first half of the year and held some cash instead.

Performance based on net asset value as at 31 December 2022 (including reinvestment of dividends, including costs)

Performance Triodos Impact Mixed Fund – Neutral

In 2022, the total net assets of Triodos Impact Mixed Fund – Neutral decreased from EUR 782.0 million to EUR 625.4 million. During this period, the return of the sub-fund (Z-Dis) was -16.3% (net of fees, including reinvestment of dividends), while the benchmark yielded -14.0%.

The relative performance of the equity investments of Triodos Impact Mixed Fund – Neutral was negatively impacted by strong currency movements (appreciation of the US dollar and weakening of the Yen) and sector allocation (no exposure in the sub-fund to fossil energy, which posted a stellar performance). The stock selection was a clear positive, owing to the sub-fund's focus on high-quality equities.

The bond investments for the sub-fund lagged their benchmark as the slightly longer duration in the last quarter of the year increased their sensitivity for the higher rates at year-end.

The tactical asset allocation had a small positive impact, as Triodos Impact Mixed Fund – Neutral was underweight equities during the first half of the year and held some cash instead.

Performance based on net asset value as at 31 December 2022 (including reinvestment of dividends, including costs)

Triodos Pioneer Impact Fund

Investment strategy

2022 was challenging for impact strategies. The best performing sector by far was Energy, driven by commodity prices that sky-rocketed after Russia invaded Ukraine. Most impact strategies have no investments in companies involved in fossil fuels; this sub-fund certainly does not. In addition, many impact strategies have a growth-oriented investment style, as they often invest in less mature and less well-established companies. This affected the performance, as value stocks sharply outperformed growth stocks.

Growth stocks were under pressure due to rising interest rates. These went up sharply as central banks increased rates to fight inflation. As growth companies often have cash flows further out in the future, discounting these at higher interest rates leads to a lower valuation.

The sub-fund continues to focus on the 'winners of tomorrow': rapidly growing companies, that may have a disruptive offering and - importantly - a positive impact on society and the environment. These companies often trade at high valuation multiples and could be labelled as growth companies. Being fully exposed to one investment style can lead to years of underperformance if this style is out of favour. Therefore, the sub-fund will be aiming for more 'balance' going forward, as also lower valued companies can also have a significant positive impact.

Positions in Danone and Edwards Lifesciences were sold as they were qualified as large caps. Going forward, the sub-fund will focus more on small- and mid-cap companies and the large-cap exposure is expected to gradually decline.

The sub-fund established new positions in the Japanese S-Pool and in the Italian electricity transmission company Terna.

Performance

In 2022, the total net assets of Triodos Pioneer Impact Fund decreased from EUR 646.6 million to EUR 583.6 million. During this period, the return of the sub-fund (Z-Cap) was -13.6% (net of fees), while the benchmark yielded -13.8%.

The sub-fund's slight outperformance was driven by stock selection, which compensated for the negative impact of the allocation to sectors and a negative currency effect. Especially stock selection within Information Technology (First Solar, SolarEdge) and Consumer Discretionary (Kyoritsu Maintenance, Strategic Education) was strong. The sub-fund is not invested in oil and gas, which had a negative impact on relative performance.

Triodos Future Generations Fund

Investment strategy

As discussed above, the year 2022 saw the return of inflation and geopolitical tensions. This was not a good environment for stocks in general and for the sub-fund in particular. Due to its theme, the sub-fund has considerable exposure to sectors such as Consumer Discretionary, Communication Services and Information Technology. These sectors proved to be more sensitive to the strong increases in interest rates and lingering worries about declining consumer spending. Consequently, they were the worst performing sectors in 2022. Defensive sectors such as Consumer Staples, Healthcare and Utilities performed much better, but the sub-fund's exposure to these sectors was not high enough to offset the negative impact of the other sectors.

The sub-fund continues to focus on selecting companies with solid fundamentals, strong balance sheets and impact-focused management teams, supported by decent cashflow-based valuations, diversifying portfolio risk over and within themes and regions as well as over different types of business models. Consequently, the sub-fund had no exposure to the Energy and Financial sectors.

The sub-fund was established on 31 March 2022, so all positions in the portfolio are new. During 2022, the sub-fund sold its positions in Philips and Natus Medical.

Performance

Since the launch of the sub-fund on 31 March 2022, the total net assets of Triodos Future Generations Fund grew from EUR 28 million to EUR 31.4 million.

The sub-fund's divergence from the benchmark was mainly driven by the stock selection in the Consumer Discretionary and Consumer Staples sectors. Currency impact is largely due to underweights in CHF and USD and an overweight in SEK. The allocation effect was negative, but there was no specific sector driving this result.

Given the short history of the sub-fund, there are no performance figures available yet.

Risk management

The sub-funds of Triodos SICAV I and all their investments are exposed to a variety of risks. Each sub-fund is intended for long-term investors who can accept the risks associated with investing primarily in the securities of the type held in that sub-fund. In addition, investors should be aware of the risks associated with the active management techniques that may be employed by the Management Company. An investment in shares of a sub-fund does not constitute a complete investment program. Investors may wish to complement an investment in a sub-fund with other types of investments.

Triodos Investment Management ensures adequate management of the relevant risks. The Management Company has therefore established an integral risk management system, which includes the risk management policy of each of the sub-funds of Triodos SICAV I and the risk management framework of the Management Company.

Risk management has been set up in accordance with the three-lines-of-defence model. The first line (the manager's executive function), the second line (the risk management function) and the third line (the internal audit function) operate independently of each other. The risk management function in the second line and the internal audit function in the third line are functionally and hierarchically separated from the sub-fund's management. (Mandatory) training sessions are organised for employees.

Triodos Investment Management has a Risk & Compliance application that enables integrated management of all risk related issues. This includes our integral risk management system, our internal 'Control Testing' and its outcomes, and our procedures relating to risk event management. In addition, the results of risk and control self-assessments are recorded, as well as the translation of the results of these sessions into the integrated risk management system. The application provides a central capture ('audit trail') for all of the above.

For the management, measurement and monitoring of financial risks, Triodos Investment Management has established an Impact & Financial Risk Committee (IFRC). The IFRC decides whether a sub-fund's risk profile is in accordance with its risk appetite. More detailed information about financial risks can be found on pages 30 to 33. In addition to financial risks, the IFRC takes into account the assessment of sustainability risks of the sub-funds.

The non-financial risks consist of operational risks and compliance risks. Operational risks are risks of

financial losses due to inadequate or failing internal processes, people and systems, or due to external events. Compliance risks are risks related to failure to comply with applicable laws and regulations. These risks are identified, assessed, managed and monitored on an ongoing basis through appropriate procedures and reports, and are discussed in the Non-Financial Risk Committee (NFRC) of Triodos Investment Management.

Non-financial risks are assessed on the basis of a pre-defined and quantified risk appetite based on the risk appetite at Triodos group level.

ISAE 3402

The objective of an ISAE 3402 report is to provide assurance to external parties on the quality of the internal control measures relating to the services provided by the Fund Manager. There are two types of ISAE 3402 report. A type I ISAE 3402 report assesses the design and implementation of control measures. A type II ISAE 3402 report not only assesses the design and implementation of control measures, but also the operational effective functioning of these control measures during the period audited.

On 15 March 2023, Triodos Investment Management issued a type II report, with an unqualified opinion from its auditor covering the period from 1 January 2022 up to and including 31 December 2022. The auditor's opinion is included in the assurance report.

Solvency

Triodos Investment Management complies with the minimum solvency requirements imposed on managers of investment institutions in accordance with the Dutch Decree on prudential rules under the Financial Supervision Act (BPR), AIFMD and the Dutch Civil Code. This makes Triodos Investment Management a robust party that can absorb setbacks to a sufficient extent.

Financial risks per sub-fund

Triodos Euro Bond Impact Fund

Investments in Triodos SICAV I are subject to several risks, which are described in detail in the prospectus. Some of the relevant financial risks are highlighted below. Triodos Euro Bond Impact Fund primarily invests in euro-denominated corporate bonds, sub-sovereign bonds and impact bonds that comply with the sustainable investment strategy described in the dedicated annex to the prospectus of Triodos SICAV I (section "Sustainability Annexes") and offer favourable investment prospects.

Interest rate risk

Interest rate risk is the risk that interest rate changes on the financial markets have a negative impact on the profit and net asset value of the sub-fund. Values of fixed-income securities generally fluctuate in inverse proportion to changes in interest rates and such fluctuations may affect bond prices accordingly. Triodos Euro Bond Impact Fund is exposed to interest rate risk. This risk is reflected by the modified duration of the portfolio, which was 5.3 as at 31 December 2022. The modified duration of the benchmark was 4.6.

Credit default risk

Credit default risk is the risk that a debt issuer defaults on its debt obligations towards the sub-fund, and the losses that might be incurred as a result. This risk is mitigated by carefully assessing the credit quality of the obligor when selecting a bond issue and is further limited by refraining from buying bonds below investment grade (BBB). In 2022, no defaults were reported for the portfolio of Triodos Euro Bond Impact Fund. The credit default risk of the sub-fund, measured in terms of the weighted average rating of the portfolio, was A+/A as at 31 December 2022. The average rating of the benchmark was A-/BBB+.

Triodos Global Equities Impact Fund

Triodos Global Equities Impact Fund primarily invests in shares of large-cap companies that are listed on worldwide markets, comply with the sustainable investment strategy described in the dedicated annex to the prospectus of Triodos SICAV I (section “Sustainability Annexes”) and offer good investment prospects.

Equity price risk

Equity price risk is the risk that arises from security price volatility, the risk of a decline in the value of a security or a portfolio. Equity price risk can be either systematic or unsystematic risk. The unsystematic equity risk can be mitigated through diversification. The sub-fund avoids large exposures to any single issuer, sector or country. The diversification of the portfolio across these categories is shown on page 65 and further. The sub-fund does not use financial derivatives to hedge against systematic risk.

Currency risk

Currency risk is the risk that unfavourable changes in exchange rates have a negative impact on the profit and net assets of the sub-fund. Currency exchange rates may fluctuate significantly over short periods of time, which may also contribute to fluctuations in the sub-fund’s performance. The reference currency for Triodos Global Equities Impact Fund is the euro, but investments may be denominated either in euros or in foreign currencies. Currency exposure affects the sub-fund’s performance,

irrespective of the performance of its securities investments, since the currency risks that arise through non-euro denominated investments are not hedged. The sub-fund’s currency exposure as a percentage of the portfolio’s assets is shown on the right.

Breakdown by currency as at 31 December 2022 (as a % of total assets)

USD	34.3
EUR	30.6
JPY	19.6
DKK	6.2
CHF	4.5
SEK	3.3
GBP	1.5

Triodos Sterling Bond Impact Fund

Triodos Sterling Bond Impact Fund primarily invests in Sterling pound-denominated corporate bonds, impact bonds, sovereign bonds and sub-sovereign bonds that comply with the sustainable investment strategy described in the dedicated annex to the prospectus of Triodos SICAV I (section “Sustainability Annexes”) and offer favourable investment prospects.

Interest rate risk

Interest rate risk is the risk that interest rate changes on the financial markets have a negative impact on the profit and net asset value of the sub-fund. Values of fixed-income securities generally fluctuate in inverse proportion to changes in interest rates and such fluctuations may affect bond prices accordingly. Triodos Sterling Bond Impact Fund is exposed to interest rate risk. This risk is reflected by the modified duration of the portfolio, which was 4.7 as at 31 December 2022. The modified duration of the benchmark was 4.2.

Credit default risk

Credit default risk is the risk that a debt issuer defaults on its debt obligations towards the sub-fund, and the losses that might be incurred as a result. This risk is mitigated by carefully assessing the credit quality of the obligor when selecting a bond issue and is further limited by refraining from buying bonds below investment grade (BBB). In 2022, no defaults were reported for the portfolio of Triodos Sterling Bond Impact Fund. The credit default risk of the sub-fund, measured in terms of the weighted average rating of the portfolio, was AA- as at 31 December 2022. The average rating of the benchmark was A.

Mixed funds (Defensive / Neutral / Offensive)

The Mixed sub-funds primarily invest in shares of large-cap companies listed on worldwide markets and in euro-denominated corporate bonds, sub sovereign bonds and impact bonds that comply with the sustainable investment strategy described in the dedicated annex to the prospectus of Triodos SICAV I (section “Sustainability Annexes”) and offer favourable investment prospects.

Equity price risk

Equity price risk is the risk that arises from security price volatility, the risk of a decline in the value of a security or a portfolio. Equity price risk can be either systematic or unsystematic risk. The unsystematic equity risk can be mitigated through diversification. The sub-funds avoid large exposures to any single issuer, sector or country. The diversification of the portfolio across these categories is shown on page 73 and further for the Defensive, Neutral and Offensive sub-fund, respectively. The sub-funds do not use financial derivatives to hedge against systematic risk.

Currency risk

Currency risk is the risk that unfavourable changes in exchange rates have a negative impact on the profit and net assets of the sub-funds. Currency exchange rates may fluctuate significantly over short periods of time, which may also contribute to fluctuations in the sub-funds’ performance. The reference currency for the Mixed sub-funds is the euro, but part of the equity portfolio of the Mixed sub-funds may be invested in financial instruments denominated either in euros or in foreign currencies.

Currency exposure affects the sub-funds’ performance, irrespective of the performance of its securities investments, since the currency risks that arise through non-euro denominated investments are not hedged. The sub-funds’ currency exposure as a percentage of the portfolio’s assets is shown in the table below.

Breakdown by currency as at 31 December 2022 (as a % of total assets)

Triodos Pioneer Impact Fund

Triodos Pioneer Impact Fund primarily invests in shares issued by small and medium-sized listed companies that are listed on worldwide markets, comply with the sustainable investment strategy described in the dedicated annex to the prospectus of Triodos SICAV I (section “Sustainability Annexes”) and offer good investment prospects.

Equity price risk

Equity price risk is the risk that arises from security price volatility, the risk of a decline in the value of a security or a portfolio. Equity price risk can be either systematic or unsystematic risk. The unsystematic equity risk can be mitigated through diversification. The sub-fund avoids large exposures to any single issuer, sector or country. The diversification of the portfolio across

these categories is shown on page 100 and further. The sub-fund does not use financial derivatives to hedge against systematic risk.

Currency risk

Currency risk is the risk that unfavourable changes in exchange rates have a negative impact on the profit and net assets of the sub-fund. Currency exchange rates may fluctuate significantly over short periods of time, which may also contribute to fluctuations in the sub-fund's performance. The reference currency for Triodos Pioneer Impact Fund is the euro, but investments may be denominated either in euros or in foreign currencies. Currency exposure affects the sub-fund's performance, irrespective of the performance of its securities investments, since the currency risks that arise through non-euro denominated investments are not hedged. Outlook

Macroeconomic outlook

In its baseline scenario, Triodos Investment Management projects global economic activity to expand by a meagre 2.5% in 2023. This is the slowest annual growth rate since 1993, apart from the 2008/09 Global Financial Crisis and the COVID pandemic. In the baseline scenario we see a continuation of the recessions that have already started in the eurozone and the UK, inflicted by the war-induced energy crisis that will keep inflation in these regions elevated until at least mid-2023. A global recession will be narrowly avoided due to near-term growth robustness in the US and Japan. However, towards the end of the year, the Management Company also expects a mild recession in the US as a result of the Fed's aggressive monetary tightening.

Triodos Investment Management expect US inflation to fall faster than inflation in the UK and the eurozone, because in the first half of 2023 European inflation will still be affected by the Russian gas supply cuts. US inflation will in the meantime fully benefit from easing global supply chain pressures, yearly base effects and the slowing of global demand.

As for monetary policy, the Management Company does not expect policy interest rate cuts in 2023, because it believes inflation will still be above central bank targets by year-end. Triodos Investment Management does, however, expect the Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) to slow their policy rate hiking going forward and to pause their hiking efforts in 2023 Q1.

A wage-price spiral, further escalation of the war in Ukraine, and renewed COVID-lockdowns in China are perceived as the main downside risks, which would tip the global economy into a recession. This would likely mean higher ultimate policy interest rate levels for longer. Upside risks are inflation falling faster than expected across advanced economies due to de-escalation of the war in Ukraine and quickly fading supply constraints. This would allow central bankers to start cutting policy interest rates in the second half of 2023. The Management Company deems this risk less likely, which means that the risks are tilted to the downside.

Bond markets outlook

Eurozone government bond yields rose sharply in 2022. The ECB is in the midst of its rate hiking cycle and seems committed to continue raising its policy interest rate to restrictive levels. This means that yields could rise even further in the near-term. At the same time, the ECB wants to prevent any significant further widening of spreads between southern European countries and the German Bund, and the eurozone will be faced with a recession due to the energy crisis stemming from the war in Ukraine. Therefore, Triodos Investment Management expects longer-term yields to start falling as the rate hike pauses come closer. The Management Company has adjusted its duration positioning accordingly to take advantage of this development. Overall, the threat of inflation surprising to the upside (forcing the ECB to become more aggressive) still makes Triodos Investment Management cautious when it comes to bonds, which explains the neutral stance.

Equity markets outlook

Despite the slowdown in economic activity, the global economy and corporate earnings have held up relatively well until now. This is due to the tight labour markets and strong consumer and corporate balance sheets. Therefore, a global recession is still not the Management Company's base scenario, as it expects the modest growth of private consumption to continue. In addition, Triodos Investment Management believes that central banks are approaching peak hawkishness, making further upside surprises less likely. However, the outlook still points to slowing growth and reduced liquidity, and analysts continue to lower their EPS estimates. The risks are therefore overwhelmingly to the downside, causing the Management Company to stick to its neutral stance.

Sustainable investment opportunities

Triodos Investment Management continues to see opportunities in the sustainable investment landscape. The European Green Deal, the EU's roadmap for making its economy sustainable, will continue to gain momentum. The related green taxonomy will enable investors to steer their investments towards more sustainable technologies and businesses, and the creation of an EU Green Bond Standard will deliver a uniform tool for assessing green bonds. The Sustainable Financial Disclosure Regulation (SFDR), part of the EU's Green Deal, also makes investors more aware of the financial risks related to sustainability, and to some extent limits the options for greenwashing. The Green Deal will also force companies to become more transparent.

Apart from in Europe, the Management Company expects to continue to find sustainable investment opportunities in Japan, where corporate governance continues to improve due to top-down governance initiatives, while bottom up the Sustainable Development Goals are high on companies' agenda's. In the US, the Inflation Reduction Act will spur the green transition with over EUR 350 billion in green subsidies. Overall, Triodos Investment Management will continue to contribute to the envisioned transition by focussing on investments that support climate mitigation and adaptation and the fulfilment of the Sustainable Development Goals in this decade.

Remuneration policy

Triodos Investment Management and Triodos Bank believe good and appropriate remuneration for all its co-workers is very important. The core elements of the International Remuneration and Nomination policy ("Remuneration Policy") of Triodos Bank Group are set out in the Principles of Fund Governance, which can be accessed via www.triodos-im.com/governance. The Remuneration Policy is applicable to all business units of Triodos Bank Group and is assessed by the Executive Board and the Supervisory Board of Triodos Bank annually.

Key elements of the Remuneration Policy are:

- The remuneration used by Triodos Investment Management does not offer bonus or share option schemes. Financial incentives are considered an inappropriate way to motivate and reward co-workers in a values-based bank. Variable remuneration is therefore limited.
- Triodos Investment Management may provide individual tokens of appreciation. These are limited and decided discretionally. They are restricted to a maximum one month's salary with a maximum of EUR 10,000 gross a year. These contributions are for extraordinary achievements and are at the discretion of management after consultation with Human Resources. Tokens of

appreciation are not based on preset targets and are always offered post factum.

- An annual collective token of appreciation can be paid for the overall achievements and contribution of all co-workers. This amount, with a maximum of EUR 500 gross per person, is the same for all co-workers, whether they work full time or part time, and awarded pro rata for those not in service throughout the whole year. For 2022, no collective end-of-year token of appreciation was awarded.

In 2022, the total remuneration of the 216 co-workers working for Triodos Investment Management amounted to EUR 23.2 million (2021: 220 co-workers, EUR 21.9 million). The increase in remuneration of 2022 versus 2021 can entirely be explained by a combination of a yearly increase in wages, and the collective labour agreement impact.

Management companies of UCITS funds are required to at least disclose information about their remuneration practices for employees whose professional activities have a material impact on those funds' risk profile (so-called 'identified staff'). The tables below provide an overview of the total remuneration, broken down into fixed and variable remuneration, and the remuneration of senior management and identified staff.

Identified staff include all co-workers in positions who may have a material impact on the risk profile of the sub-funds. Besides the members of the Management Board of Triodos Investment Management, these include fund managers and managers of support departments. In 2022, there were no co-workers at Triodos Investment Management with a total remuneration of EUR 1 million or more. Triodos SICAV I does not have any co-workers.

Triodos Investment Management improved its method for the allocation of costs. As of 2021, costs are allocated using activity-based costing. By clearly identifying activities that are necessary to manage a fund and allocating the costs of each activity, it provides insight where the actual costs are made. As these tables are intended to show the remuneration of co-workers, all other costs incurred by the Management Company, such as housing, workplace and travel costs and the cost of outsourced activities and external consultants (unless hired to replace ill/absent co-workers), are excluded. The amounts shown in the tables include income tax, social security contributions, pension contributions and tokens of appreciation.

Notes to the Financial Statements as at 31 December 2022

Note 1 - General

Triodos SICAV I is an open-ended investment company with a designated management company, incorporated under the laws of the Grand Duchy of Luxembourg as a “Société d’Investissement à Capital Variable” (SICAV) in the form of a “société anonyme”. Triodos SICAV I is governed by the law of the Grand Duchy of Luxembourg of 10 August 1915 on commercial companies, as amended, and by part I of the Law of 17 December 2010, as amended. Triodos SICAV I has appointed Triodos Investment Management as its authorised UCITS management company.

The fund (and each of its sub-funds) does not qualify as a “structured UCITS” within the meaning of article 36(1) of Commission Regulation (EU) No 583/2010 of 1 July 2010 implementing Directive 2009/65/EC.

The fund has been incorporated under the name of Triodos SICAV I for an unlimited period. The registered office of Triodos SICAV I is established at 11-13, boulevard de la Foire, L-1528 Luxembourg.

The articles of incorporation of Triodos SICAV I were last amended at the extraordinary general meeting of shareholders held on 19 May 2021 and published in the Recueil des Sociétés et Associations (RESA). The R.C.S. number of the fund is B119.549.

The shares to be issued shall be issued in several separate sub-funds of Triodos SICAV I. A separate portfolio of assets is maintained for each sub-fund and is invested in accordance with the investment objective for that sub-fund. As a result, Triodos SICAV I is commonly known as an “umbrella fund” enabling investors to choose between one or more investment objectives by investing in one or more sub-funds. Investors may choose which sub-fund(s) may be most appropriate for their specific risk and return expectations as well as their diversification needs.

As at 31 December 2022, Triodos SICAV I has eight sub-funds that are open to investors:

- Triodos Euro Bond Impact Fund (launched on 16 July 2007), known as Triodos Sustainable Bond Fund until 15 May 2019
- Triodos Global Equities Impact Fund (launched on 16 July 2007), known as Triodos Sustainable Equity Fund until 15 May 2019
- Triodos Sterling Bond Impact Fund (launched on 30 October 2020)
- Triodos Impact Mixed Fund - Defensive (launched on 21 June 2019)
- Triodos Impact Mixed Fund - Neutral (launched on 25 June 2010), known as Triodos Sustainable Mixed Fund until 15 May 2019
- Triodos Impact Mixed Fund - Offensive (launched on 21 June 2019)
- Triodos Pioneer Impact Fund (launched on 12 March 2007), known as Triodos Sustainable Pioneer Fund until 15 May 2019
- Triodos Future Generations Fund (launched on 31 March 2022)

All the sub-funds are denominated in euros except for Triodos Sterling Bond Impact Fund which is denominated in British pounds. The sub-funds may offer shares of the following classes:

Base share class	Currency	Available to	Minimum investment/ holding amount	Subscription tax ¹
I	EUR	Institutional investors	EUR 1 million	0.01%
I-II	EUR	Institutional investors	EUR 25 million	0.01%
K-Institutional	GBP	Institutional investors	GBP 800,000	0.01%
K-Retail	GBP	Investors buying shares via sub-distributors or financial intermediaries who cannot retain any commission	N/A	0.05%
K-P	GBP	Entities of Triodos group	N/A	0.01%
N-Institutional	NOK	Institutional investors	NOK 10 million	0.01%
N-Retail	NOK	Investors buying shares via sub-distributors or financial intermediaries who cannot retain any commission	N/A	0.05%
P	EUR	Entities of Triodos group	N/A	0.01%
R	EUR	Investors buying shares via sub-distributors or financial intermediaries who cannot retain any commission	N/A	0.05%
U-Institutional	USD	Institutional investors	USD 1 million	0.01%
U-Institutional-II	USD	Institutional investors	USD 25 million	0.01%
U-Z	USD	Investors buying shares via sub-distributors or financial intermediaries who cannot retain any commission	N/A	0.05%
Z	EUR	Investors buying shares via sub-distributors or financial intermediaries who cannot retain any commission	N/A	0.05%

¹ Shares are subject to a subscription tax at an annual rate of a percentage of the net assets, calculated and payable quarterly at the end of the relevant quarter.

Note 2 – Summary of significant accounting policies

The financial statements are prepared in accordance with Luxembourg regulations relating to investment funds using the following significant accounting policies.

a) Valuation of investments

The value of such assets is determined as follows:

The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interests declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.

The value of transferable securities, money market instruments and any other financial assets listed or dealt in on a regulated market, a stock exchange in another state or on any other regulated market is based on the last available price on the relevant market which is normally the principal market for such assets.

In the event that any assets are not listed or dealt in on any regulated market, any stock exchange in another state or on any other regulated market, or if, with respect to assets listed or dealt in on any such markets, the price as determined above is not representative of the fair market value of the relevant assets, the value of such assets will be based on reasonably foreseeable sales prices determined prudently and in good faith by the Board of Directors.

b) Net realised profit / (loss) on sales of investments

The net realised profit / (loss) on sales of investments is calculated on the basis of average cost of investments sold.

c) Foreign exchange translation

Triodos SICAV I maintains its accounting records in euros and its financial statements are expressed in this currency.

Assets and liabilities which are not denominated in euros are translated into euros at the rate of exchange prevailing in Luxembourg at applicable exchange rates at the end of the year.

Income and expenses in currencies other than euros are translated into euros at the applicable exchange rates prevailing on the transaction date. Resulting realised and unrealised foreign exchange gains or losses are included in the statement of operations and changes in net assets. The exchange rates used at 31 December 2022 are:

c) Foreign exchange translation (continued)

1 EUR = 1.573767 AUD	1 EUR = 131.694225 KES
1 EUR = 5.634810 BRL	1 EUR = 10.513432 NOK
1 EUR = 0.987420 CHF	1 EUR = 1.687485 NZD
1 EUR = 7.436453 DKK	1 EUR = 11.120199 SEK
1 EUR = 0.887231 GBP	1 EUR = 1.067250 USD
1 EUR = 140.818217 JPY	

d) Income from investments

Interest on fixed income securities is accrued prorata temporis on each net asset calculation date and dividends are accrued on an ex- dividend basis.

e) Allocation of expenses

Each sub-fund shall pay for the general costs and expenses directly attributable to it. These fees are all part of the service fee.

General costs and expenses that cannot be attributed to a given sub-fund shall be allocated to the sub-funds, in proportion to their respective net assets. These fees are all part of the service fee.

Since the introduction of MiFID II on 3 January 2018, research costs have to be paid either by the fund, or by the investment manager. The choice was made to have the investment manager pay for the research costs. No research costs are allocated to the sub-funds.

f) Formation expenses

The costs and expenses of the formation of the fund have been borne by the fund and amortised over a period of five years. Expenses incurred in connection with the creation of any additional sub-fund shall be borne by the relevant sub-fund and, where applicable, will be written off in proportion to their net assets over a period not exceeding five years.

Note 3 - Determination of the net asset value of shares

The net asset value per share of each sub-fund is expressed in the reference currency of the relevant sub-fund and is calculated for each sub-fund by dividing the assets of such sub-fund less its liabilities by the number of shares in issue in respect of such sub-fund.

Note 4 - Fees

4.1 Management fees

The annual management fee of each sub-fund is used to cover charges and expenses of the sub-fund to be paid to the management company, the investment manager (if any) and the distributors of each sub-fund in relation to share distribution (if applicable). The annual management fee is accrued daily out of the assets attributable to the relevant class of shares or sub-fund as a percentage of the net asset value.

Management fees

Sub-fund	Fee R-class	Fee Z-class	Fee I-class	Fee I-II-class	Fee K-I class

* This share class was launched on 22 November 2022.

** Triodos Future Generations Fund was launched on 31 March 2022.

*** As from 1 January 2022, the British pound-denominated “K-Institutional” share classes of Triodos Pioneer Impact Fund have been renamed into “K-Institutional-II”. These renamed share classes have the same terms as an “I-II” share class.

– This share class is not active.

N/A This share class is not offered for this sub-fund.

4.2 Service fees

The annual service fee of the sub-fund is also used to cover all charges and expenses to the depositary, the administrative agent, the registrar and transfer agent, the domiciliary agent and the paying agent. The annual service fee is accrued daily out of the assets attributable to the relevant class of shares or sub-fund as a percentage of the net asset value.

The share classes incur a fixed annual service fee to cover the expenses related to the administration and safekeeping of assets, and other ongoing operating and administrative expenses. The service fee is fixed in the sense that the management company bears the excess of any such expenses above the rate specified for each share class in the table below. Conversely, the management company is entitled to retain any amount by which the rate of these fees to be borne by the share classes, as set out in the table below, exceeds the actual expenses incurred by the relevant class of the relevant sub-fund.

The percentages of the service fees are as follows:

Service fee

Sub-fund	Class R, Class R-H, Class Z and Class K-R	Class I, Class I-II, Class K-Institutional, Class K-Institutional-II, and Class P
Triodos Euro Bond Impact Fund	0.20% p.a.	0.15% p.a.

Triodos Future Generations Fund*	0.20% p.a.	0.15% p.a.

* Triodos Future Generations Fund was launched on 31 March 2022.

4.3 Taxes

All payable taxes are charged separately to the fund, value added tax exempted. This mainly reverts to the Subscription taxes as mentioned in Note 1 and 6.

Note 5 - Distributions

In each class of shares within each sub-fund, the Board of Directors may issue capitalisation shares and distribution shares. Distribution shares may pay a dividend to their holders, whereas capitalisation shares capitalise their entire earnings.

The annual general meeting shall decide, on recommendation of the Board of Directors, what share of Triodos SICAV I's profits shall be distributed from each relevant class of shares. Consequently, the annual general meeting may approve, for each sub-fund or class of shares, the distribution of the net income and capital gains, realised or unrealised, after deduction of capital losses, realised or unrealised. The amounts corresponding to income attributable to the shares of a class for which it was decided not to pay a dividend will be capitalised in the assets of the class concerned.

Details of dividend distributions in 2022:

Sub-fund	Share class	Ex-dividend date	Payment date	Currency	Amount per share
Triodos Euro Bond Impact Fund	I-Dis	2 May 2022	6 May 2022	EUR	0.10
Triodos Euro Bond Impact Fund	I-II-Dis	2 May 2022	6 May 2022	EUR	0.14
Triodos Euro Bond Impact Fund	Z-Dis	2 May 2022	6 May 2022	EUR	0.07
Triodos Global Equities Impact Fund	I-Dis	2 May 2022	6 May 2022	EUR	0.35
Triodos Global Equities Impact Fund	I-II-Dis	2 May 2022	6 May 2022	EUR	0.28
Triodos Global Equities Impact Fund	KI-Dis	2 May 2022	6 May 2022	GBP	0.14
Triodos Global Equities Impact Fund	KR-Dis	2 May 2022	6 May 2022	GBP	0.20
Triodos Global Equities Impact Fund	Z-Dis	2 May 2022	6 May 2022	EUR	0.25
Triodos Impact Mixed Fund - Defensive	Z-Dis	2 May 2022	6 May 2022	EUR	0.04
Triodos Impact Mixed Fund - Neutral	Z-Dis	2 May 2022	6 May 2022	EUR	0.13

Triodos Sterling Bond Impact Fund	KR-Dis	2 May 2022	6 May 2022	GBP	0.17

Note 6 - Subscription tax

Triodos SICAV I is currently not liable to any Luxembourg tax on profits or income, nor are distributions paid by Triodos SICAV I liable to any Luxembourg withholding tax. Triodos SICAV I is, however, liable to an annual subscription tax in Luxembourg, which in principle amounts to 0.05% per annum of its net asset value, such tax being payable quarterly on the basis of the value of the aggregate net assets of the sub-funds at the end of the relevant calendar quarter. However, such rate may be reduced to 0.01% per annum of the net asset value for specific classes of shares or sub-funds which are restricted to institutional investors (Class I, Class I-II, Class K-I, Class K-I-II, Class U-I-II and Class P shares). Furthermore, if some sub-funds invest in other Luxembourg UCIs which in turn are subject to the annual subscription tax, no annual subscription tax is payable by Triodos SICAV I on the portion of assets invested therein.

Note 7 - Forward foreign exchange contracts

No collateral has been received in relation to the forward foreign exchange contracts.

Triodos Impact Mixed Fund - Neutral

As at 31 December 2022, the sub-fund had entered into the following forward foreign exchange contracts:

Maturity date	Currency purchased	Amount purchased	Currency sold	Amount sold	Net unrealised appreciation (depreciation)
31/01/2023	EUR	251,592	USD	267,875	1,179
31/01/2023	EUR	24,297	SEK	269,767	47
31/01/2023	EUR	139,704	JPY	19,876,699	(1,745)
31/01/2023	EUR	33,312	CHF	32,806	41
31/01/2023	EUR	43,694	DKK	324,946	(16)
31/01/2023	USD	3,153	EUR	2,951	(3)
				EUR	(497)

The counterparty is RBC Investor Services Bank S.A.

Note 8 - Transaction costs

For the year ended 31 December 2022, Triodos SICAV I incurred transaction costs relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets as follows. The aforementioned incurred transaction costs are to be considered as a part of the acquisition cost of the assets they belong to.

Sub-fund	2022 EUR	2021 EUR

Note 10 - Global exposure

As required by Circular CSSF 11/512, the Board of Directors must determine the fund's risk management method, using either the commitment approach or the VaR approach. The Board of Directors of Triodos SICAV I has chosen to adopt the commitment approach as the method for determining overall risk.

* This share class was (re-)launched in 2022. Ongoing charges 2022 is based on best estimate (ex-ante).

** As from 1 January 2022, the British pound-denominated “K-Institutional” share classes of Triodos Pioneer Impact Fund have been renamed into “K-Institutional-II”. These renamed share classes have the same terms as an “I-II” share class.

The ongoing charges reflect the total normalised expenses charged to the result, divided by the average net asset value. For the calculation of the average net asset value, each computation and publication of the net asset value is taken into account. The ongoing charges are calculated over the twelve-month period ending at the end of the reporting period.

Note 12 - Subsequent events

There are no significant events after the reporting date which in the opinion of the Board of Directors requires disclosure in the financial statements.

Note 13 - Movement schedule

The movements in the Statement of investments during the year are available upon request, free of charge, via tridosIM@tridos.com.

To the Shareholders of
Triodos SICAV I

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Triodos SICAV I (the “Fund”) and of each of its sub-funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 December 2022;
- the combined statement of operations and changes in net assets for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended;
- the statement of investments as at 31 December 2022; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for

Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund’s and each of its sub-funds’ ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund’s or any of its sub-funds’ ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of

our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Unaudited other information: Sustainability-related disclosures

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph of Regulation (EU) 2020/852

Product name: Triodos Euro Bond Impact Fund
Legal entity identifier: 549300G4PBVRI0QZIV03

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 57.9%</p> <p><input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 40.5%</p>	<p><input type="radio"/> <input type="radio"/> <input type="checkbox"/> No</p> <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the sub-fund are to:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

The (environmental) objective to contribute to the transition to an economy within planetary boundaries is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Sustainable Mobility and Infrastructure (be mobile, live and work in a sustainable way)
- Renewable Resources (limit the use of finite resources)
- Circular Economy (make use of resources as efficiently and long as possible)
- Innovation for Sustainability (innovate for a sustainable future)

The (social) objective to contribute to the transition to an economy where all humans can enjoy a prosperous life is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Prosperous and Healthy People (become and stay healthy and happy)
- Social Inclusion and Empowerment (create a society in which all people can fully participate)
- Innovation for Sustainability (innovate for a sustainable future)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation
- climate change adaptation

The sub-fund realised its three sustainable investment objectives by investing solely in listed bonds that actively contribute to at least one transition theme.

How did the sustainability indicators perform?

In order to measure the attainment of its sustainable investment objectives, the sub-fund measures its exposure to the Triodos transition themes as a percentage of portfolio holdings that contribute to at least one transition theme and as a percentage of assets under management allocated to each theme. Since each Triodos transition theme is linked to one or more UN Sustainable Development Goals (SDGs), the sub-fund also reports its absolute and relative contribution to environmental (SDGs 6, 7, 11, 12, 13 and 15) or social (SDGs 1, 2, 3, 4, 5, 10 and 16) SDGs based on external data performing a comprehensive assessment of company products and services that affect SDGs. The contribution is measured by SDG scores, which range on a scale from -10 (products/services having a significant obstructing impact to the SDGs) to 10 (products/services having a significant contributing impact to the SDGs). The sub-fund also reports its carbon footprint relative to its benchmark (scope 1 and 2 emissions). The benchmark of the sub-fund (used for performance measurement only) is iBoxx Euro Corporates Overall Total Return (60%) and iBoxx Euro Eurozone Sovereign 1-10 Total Return (40%).

In 2022, all investments contributed to at least one of the transition themes. All seven transition themes were represented in the sub-fund with the largest exposure at year-end to Sustainable Mobility and Infrastructure (45.7% of NAV).

The contribution of the sub-fund to the SDGs was significantly higher than that of the benchmark. The sub-fund particularly contributed to SDG3, SDG10 and SDG11.

	Sub-fund	Benchmark
Environmental SDGs	1.2	-0.3
Social SDGs	2.4	0.4

Source: ISS SDG Product & Services Score as of 31 December 2022

The carbon footprint of the sub-fund was lower than that of the benchmark:

	Sub-fund	Benchmark
Carbon footprint (tonnes of CO ₂ equivalent)	11,595	19,459

Source: ISS as of 31 December 2022

The performance of the indicators is a consequence of the investment strategy of the sub-funds and not a result of targeting specific indicator results. The data used to calculate the performance of the sustainability indicators is derived by the Management Company from companies directly and/or via data providers and have not been subject to an assurance by an auditor or a review by a third party.

...and compared to previous periods?

Compared to 2021, the contribution of the sub-fund to the transition themes has changed as follows:

	31 December 2022	31 December 2021
Social Inclusion and Empowerment	23.0%	27.4%
Prosperous and Healthy People	13.3%	9.1%
Sustainable Food and Agriculture	4.1%	2.9%
Renewable Resources	9.1%	7.1%
Circular Economy	1.0%	1.0%
Innovation for Sustainability	2.3%	1.8%
Sustainable Mobility and Infrastructure	45.7%	45.8%
Cash	1.6%	2.2%
Regular (sub-)sovereign bonds	–	2.6%

The contribution of the sub-fund to the SDGs as at 31 December 2022 was higher than as at 31 December 2021:

	31 December 2022	31 December 2021
Environmental SDGs	1.2	0.6
Social SDGs	2.4	2.1

The relative carbon footprint of the sub-fund was lower as at 31 December 2022 than as at 31 December 2021:

	31 December 2022	31 December 2021
Carbon footprint (tonnes of CO ₂ equivalent)	-40.4%	-33.9%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To select only those investments that do not cause significant harm to any environmental or social sustainable investment objective, every (new) investment has been assessed on its alignment with the Minimum Standards or the Sovereign Framework (depending on the type of instrument). If an issuer was found to cause significant harm to any of those standards, it was excluded from investment. All applicable PAIs on sustainability factors have been taken into account in the investment process. The Minimum Standards, that are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, also set out the minimum standards for employee relations, remuneration, taxes and other corporate governance topics that investees must meet in order to be eligible for investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

With the introduction of the SFDR Delegated Regulation as from 1 January 2023, PAIs have been introduced to establish standards for reporting on principal adverse impacts. The process for taking into account PAIs as applied from 1 January 2023 is detailed below. In 2022, all investments of the sub-fund were screened against the Minimum Standards to avoid or reduce principal adverse impacts when investing.

For instruments issued by companies (e.g. corporate bonds, impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact, consisting of three steps), both as part of the initial screening and the continuous monitoring of investments:

1. Negative screening: Every (potential) investee has been screened for involvement in controversial business activities. If an investee exceeded the threshold below, “high concern” was concluded, and the investee was excluded from investment.

Triodos controversial activity	SFDR PAI	Threshold
Controversial weapons	14 (Exposure to controversial weapons)	Any involvement
Fossil fuels	4 (Exposure to companies active in the fossil fuel sector)	GICS Energy Sector classification (i.e. companies active in the fossil fuel sector)
Hazardous substances	E9 (Investments in companies producing chemicals)	Pesticides – production, distribution (>5% revenue) Persistent Organic Pollutants – production, use (>0% revenue)

2. Controversies: Every (potential) investee has been assessed on violations of UN Global Compact and OECD Guidelines for Multinational Enterprises on a case-by-case basis considering violations in the last three years. Per case, the verification of information, severity and company response were considered to conclude if a case was low, medium or high concern. In case a company had been involved in severe and/or frequent violations without taking credible remediation measures, “high concern” was concluded, and the investee was excluded from investment.

Triodos assessment	SFDR PAI	Threshold
Controversies	10 (Violations of UN Global Compact principles and OECD Guidelines) 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines) S7 (Incidents of discrimination) S14 (Number of severe human rights issues and incidents) S16 (Cases of insufficient action with breaches of anti-corruption) S17 (Convictions and fines for anti-corruption)	Significant violations of UN Global Compact or OECD Guidelines within the last 3 years

3. ESG assessment: By combining our proprietary materiality map, highlighting material ESG issues per industry, with an understanding of the company’s actual business activities, the risk that an investee inflicts negative impacts on these ESG issues has been assessed. Based on the risk classification (low, medium or high risk), the company must have met additional requirements such as having sustainability programs, reporting, certifications, policies or practices in place. In case a company did not meet these requirements but was in transition, it was flagged for engagement. The PAI indicators were considered on an absolute basis, over time and compared to five peers (where relevant). Taking all the above into consideration, a company’s practices were assessed as low, medium or high concern. If “high concern” was concluded, the investee was excluded from investment.

Triodos			
ESG issue		SFDR PAI	Threshold
Environmental	Climate change	1 (GHG emissions) 2 (Carbon footprint) 3 (GHG intensity) 5 (Share of non-renewable energy consumption and production) 6 (Energy consumption intensity) E4 (Companies without carbon reduction initiatives) E5 (Energy consumption per non-renewable energy source)	High risk for climate change without GHG emissions reporting and Paris-aligned reduction targets; Significant controversies
	Water	E6 (Water usage and recycling) E7 (Investments in companies with-out water management policies) E8 (Exposure to areas of high water stress)	High risk for water scarcity without activities to reduce freshwater use; Significant controversies
	Waste	E13 (Non-recycled waste ratio)	Significant controversies
	Pollution	8 (Emissions to water) 9 (Hazardous and radioactive waste ratio) E2 (Emissions of air pollutants)	Significant controversies
	Ecosystems	7 (Activities negatively affecting biodiversity) E11 (Companies without sustainable land/agriculture practice) E12 (Companies without sustainable oceans/seas practice) E15 (Deforestation)	High risk for human rights or conflict minerals without relevant policy and practices; Significant controversies
	Social	Human rights & community	S9 (Lack of human rights policy) S10 (Lack of human rights due diligence)
Labour practices		S1 (Companies without workplace accident prevention policies) S2 (Rate of accidents) S3 (Numbers of days lost to injuries, accidents, fatalities or illness) S4 (Lack of supplier code of conduct) 12 (Unadjusted gender pay gap) S5 (Lack of grievance/complaints mechanism for employee matters) S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights without relevant policies, targets and monitoring; Significant controversies
Supply chain management		S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights in the supply chain without relevant policies, targets and monitoring; Significant controversies
Governance		Corporate governance	13 (Board gender diversity) S8 (Excessive CEO pay ratio)
	Business ethics	S15 (Lack of anti-corruption and anti-bribery policies) S6 (Insufficient whistleblower protection)	Significant controversies

For instruments issued by sovereigns (e.g. impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact), both as part of the initial screening and the continuous monitoring of investments:

Triodos ESG issue	SFDR PAI	Threshold
Environmental	15 (GHG intensity)	Ratification of: <ul style="list-style-type: none">• Paris Convention• Framework Convention on Climate Change• Kyoto Protocol
Governance	16 (Investee countries subject to social violations)	<ul style="list-style-type: none">• Ratification of international controversial weapons conventions• United Nations and European Union sanctions

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

All investments made in 2022 were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Prior to being selected for investment and for the entire duration of the investment, (potential) investees are screened for compliance with the Minimum Standards. The Minimum Standards are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Alignment with the Minimum Standards is assessed in the second phase of the investment process through the check on controversies and the ESG assessment, based on data from external sources and additional in-house desk research (see above the answer to question 'How were the indicators for adverse impacts on sustainability factors taken into account?'). In case of significant violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (i.e. having severe impact, recurrence of incidents, lack of risk management and inadequate remediation measures), the investee is excluded from investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered all PAIs on sustainability factors referred to in the tables above. Every potential investment has been assessed using the relevant policies and if an issuer was found to cause significant harm, it was excluded from investment. PAIs have been continuously monitored to ensure the sub-fund remained compliant with our policies.

In 2022, continuous monitoring led to one company (Adecco) being excluded from the Triodos SICAV I investable universe due to an acquisition with involvement in weapons (relating to PAI indicator: Exposure to controversial weapons).

The engagement efforts with investee companies aimed at minimising principal adverse impacts were focused on the PAI indicators related to greenhouse gas emissions, companies producing chemicals and excessive CEO pay ratio.

The list includes the investments constituting the greatest proportion of investments of the financial during the reference period which is: 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
German Government bond	General public administration activities	2.4	Germany
German Government bond	General public administration activities	1.8	Germany
European Union	Activities of extraterritorial organisations and bodies	1.8	Belgium
AkzoNobel	Manufacture of paints, varnishes and similar coatings, printing ink and mastics	1.6	Netherlands
Madrid	General public administration activities	1.5	Spain
Coloplast	Other financial service activities, except insurance and pension funding	1.3	Netherlands
Council Of Europe Development Bank	Activities of extraterritorial organisations and bodies	1.3	France
Philips	Manufacture of medical and dental instruments and supplies	1.3	Netherlands
NRW Bank	General public administration activities	1.3	Germany
Baxter	Manufacture of medical and dental instruments and supplies	1.3	United States
Madrid	General public administration activities	1.3	Spain
Deutsche Post	Other postal and courier activities	1.3	Germany
Hamburger Hochbahn	Passenger rail transport, interurban	1.2	Germany
Ferrovie dello Stato Italiane	Passenger rail transport, interurban	1.2	Italy
Île-de-France	General public administration activities	1.2	France

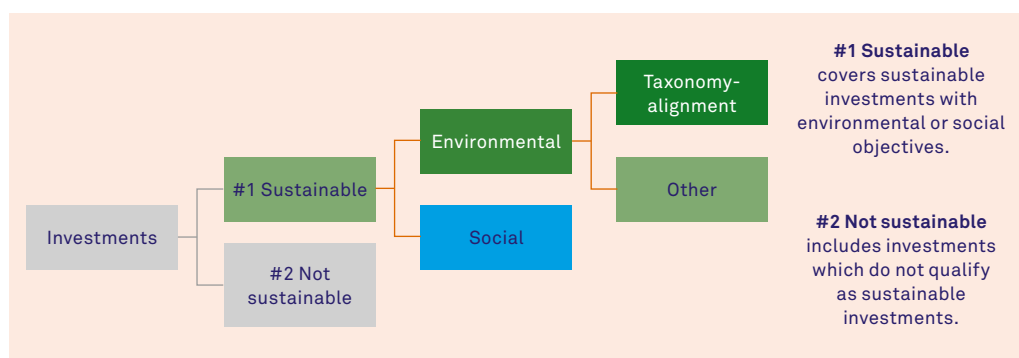

Source (Sector): NACE5

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.4% of the net assets of the sub-fund were invested in sustainable investments as per 31 December 2022.

In which economic sectors were the investments made?

Several new investments were done over the year 2022. The investments have been done across sectors related to:

- General public administration activities
- Rental and operating of own or leased real estate
- Manufacture of medical and dental instruments and supplies

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- Transmission of electricity
- Water collection, treatment and supply
- Manufacture of other chemical products
- Monetary intermediation
- Other credit granting
- Production of electricity
- Passenger rail transport, interurban
- Manufacture of other parts and accessories for motor vehicles

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation (1.4%)
- climate change adaptation (0%)

As per 31 December 2022, 1.4% of the investments were Taxonomy aligned. The sub-fund had exposure to impact bonds issued by (sub-)sovereigns.

The Taxonomy percentages shown in the graphs below have not been subject to an assurance by an auditor or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas
 - In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2022, the sub-fund invested 0.0% of its investments in enabling activities and 0.5% in transitional activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As the reporting on Taxonomy alignment is only in place since this year, a comparison with the Taxonomy alignment figures of the previous reporting period will only be available in the annual report over 2023.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 78.9% as at 31 December 2022.

We do not steer on the percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Triodos transition themes, which are used for the positive selection of the investments, encompass more environmentally sustainable economic activities than currently covered by the EU Taxonomy. Presently, the EU Taxonomy focusses on certain sectors only, whereas the Triodos transition themes are sector-agnostic. The percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is likely to decrease over time as the remaining four Taxonomy objectives are finalised and more economic activities are added to the Taxonomy.

What was the share of socially sustainable investments?

The share of sustainable investments contributing to a social objective was 40.5% as at 31 December 2022.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund held 1.6% of its net assets in cash and cash equivalents as ancillary liquidity. Cash and cash equivalents did not affect the delivery of the sustainable investment objectives of the sub-fund on a continuous basis. Firstly, they were used - in limited proportion - to support the proper liquidity management of the sub-fund. Secondly, the Management Company assessed on a regular basis whether counterparties for cash and cash equivalents comply with the four pillars of the UN Global Compact, using data from a third-party provider. These four pillars consist of 1) human rights, 2) labour rights 3) environment and 4) anti-corruption. Also, the Management Company assessed its counterparties' policies and sustainability performance.

What actions have been taken to attain the sustainable investment objective during the reference period?

In 2022, company contact took place with 35 issuers in the sub-fund. For example, with Prologis contact took place to discuss their remuneration policy. With Toyota Motor multiple contact took place to discuss allegations about their lobby activities and climate change. In both cases, the response of the company was deemed sufficient, so they could be maintained in the investment universe and portfolio of the sub-fund.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Product name: Triodos Global Equities Impact Fund
Legal entity identifier: 549300NVRM8GEQYQI395

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 39.3%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 59.8%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the sub-fund are to:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

The (environmental) objective to contribute to the transition to an economy within planetary boundaries is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Sustainable Mobility and Infrastructure (be mobile, live and work in a sustainable way)
- Renewable Resources (limit the use of finite resources)
- Circular Economy (make use of resources as efficiently and long as possible)
- Innovation for Sustainability (innovate for a sustainable future)

The (social) objective to contribute to the transition to an economy where all humans can enjoy a prosperous life is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Prosperous and Healthy People (become and stay healthy and happy)
- Social Inclusion and Empowerment (create a society in which all people can fully participate)
- Innovation for Sustainability (innovate for a sustainable future)

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

- climate change mitigation
- climate change adaptation

The sub-fund realised its three sustainable investment objectives by investing solely in listed equities that actively contribute to at least one transition theme.

How did the sustainability indicators perform?

In order to measure the attainment of its sustainable investment objectives, the sub-fund measures its exposure to the Triodos transition themes as a percentage of portfolio holdings that contribute to at least one transition theme and as a percentage of assets under management allocated to each theme. Since each Triodos transition theme is linked to one or more UN Sustainable Development Goals (SDGs), the sub-fund also reports its absolute and relative contribution to environmental (SDGs 6, 7, 11, 12, 13 and 15) or social (SDGs 1, 2, 3, 4, 5, 10 and 16) SDGs based on external data performing a comprehensive assessment of company products and services that affect SDGs. The contribution is measured by SDG scores, which range on a scale from -10 (products/services having a significant obstructing impact to the SDGs) to 10 (products/services having a significant contributing impact to the SDGs). The sub-fund also reports its carbon footprint relative to its benchmark (scope 1 and 2 emissions). The benchmark of the sub-fund (used for performance measurement only) is MSCI World Index.

In 2022, all investments contributed to at least one of the transition themes. All seven transition themes were represented in the sub-fund with the largest exposure at year-end to Prosperous and Healthy People (29.8% of NAV).

The contribution of the sub-fund to the SDGs was significantly higher than that of the benchmark. The sub-fund particularly contributed to SDG3, SDG7 and SDG13.

	Sub-fund	Benchmark
Environmental SDGs	1.9	-0.2
Social SDGs	3.1	1.1

Source: ISS SDG Product & Services Score as of 31 December 2022

The carbon footprint of the sub-fund was lower than that of the benchmark:

	Sub-fund	Benchmark
Carbon footprint (tonnes of CO ₂ equivalent)	44,940	93,609

Source: ISS as of 31 December 2022

The performance of the indicators is a consequence of the investment strategy of the sub-funds and not a result of targeting specific indicator results. The data used to calculate the performance of the sustainability indicators is derived by the Management Company from companies directly and/or via data providers and have not been subject to an assurance by an auditor or a review by a third party.

...and compared to previous periods?

Compared to 2021, the contribution of the sub-fund to the transition themes has changed as follows:

	31 December 2022	31 December 2021
Social Inclusion and Empowerment	15.1%	13.3%
Prosperous and Healthy People	29.8%	30.9%
Sustainable Food and Agriculture	7.1%	6.9%
Renewable Resources	7.0%	5.6%
Circular Economy	3.5%	2.9%
Innovation for Sustainability	22.0%	20.4%
Sustainable Mobility and Infrastructure	14.6%	15.3%
Cash	0.8%	4.7%

The contribution of the sub-fund to the SDGs as at 31 December 2022 was higher than as at 31 December 2021:

	31 December 2022	31 December 2021
Environmental SDGs	1.9	1.4
Social SDGs	3.1	2.6

The relative carbon footprint of the sub-fund was lower as at 31 December 2022 than as at 31 December 2021:

	31 December 2022	31 December 2021
Carbon footprint (tonnes of CO ₂ equivalent)	-52.0%	-21.1%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To select only those investments that do not cause significant harm to any environmental or social sustainable investment objective, every (new) investment has been assessed on its alignment with the Triodos Minimum Standards policy (Minimum Standards). If an issuer was found to cause significant harm to any of those standards, it was excluded from investment. All applicable principal adverse impact indicators (PAIs) on sustainability factors have been taken into account in the investment process. The Minimum Standards, that are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, also set out the minimum standards for employee relations, remuneration, taxes and other corporate governance topics that investees must meet in order to be eligible for investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

With the introduction of the SFDR Delegated Regulation as from 1 January 2023, PAIs have been introduced to establish standards for reporting on principal adverse impacts. The process for taking into account PAIs as applied from 1 January 2023 is detailed below. In 2022, all investments of the sub-fund were screened against the Minimum Standards to avoid or reduce principal adverse impacts when investing.

The PAIs have been taken into account in the second phase of the investment process (negative impact, consisting of three steps), both as part of the initial screening and the continuous monitoring of investments:

1. Negative screening: Every (potential) investee has been screened for involvement in controversial business activities. If an investee exceeded the threshold below, “high concern” was concluded, and the investee was excluded from investment.

Triodos controversial activity	SFDR PAI	Threshold
Controversial weapons	14 (Exposure to controversial weapons)	Any involvement
Fossil fuels	4 (Exposure to companies active in the fossil fuel sector)	GICS Energy Sector classification (i.e. companies active in the fossil fuel sector)
Hazardous substances	E9 (Investments in companies producing chemicals)	Pesticides – production, distribution (>5% revenue) Persistent Organic Pollutants – production, use (>0% revenue)

2. Controversies: Every (potential) investee has been assessed on violations of UN Global Compact and OECD Guidelines for Multinational Enterprises on a case-by-case basis considering violations in the last three years. Per case, the verification of information, severity and company response were considered to conclude if a case was low, medium or high concern. In case a company had been involved in severe and/or frequent violations without taking credible remediation measures, “high concern” was concluded, and the investee was excluded from investment.

Triodos assessment	SFDR PAI	Threshold
Controversies	10 (Violations of UN Global Compact principles and OECD Guidelines) 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines) S7 (Incidents of discrimination) S14 (Number of severe human rights issues and incidents) S16 (Cases of insufficient action with breaches of anti-corruption) S17 (Convictions and fines for anti-corruption)	Significant violations of UN Global Compact or OECD Guidelines within the last 3 years

3. ESG assessment: By combining our proprietary materiality map, highlighting material ESG issues per industry, with an understanding of the company’s actual business activities, the risk that an investee inflicts negative impacts on these ESG issues has been assessed. Based on the risk classification (low, medium or high risk), the company must have met additional requirements such as having sustainability programs, reporting, certifications, policies or practices in place. In case a company did not meet these requirements but was in transition, it was flagged for engagement. The PAI indicators were considered on an absolute basis, over time and compared to five peers (where relevant). Taking all the above into consideration, a company’s practices were assessed as low, medium or high concern. If “high concern” was concluded, the investee was excluded from investment.

Triodos			
ESG issue		SFDR PAI	Threshold
Environmental	Climate change	1 (GHG emissions) 2 (Carbon footprint) 3 (GHG intensity) 5 (Share of non-renewable energy consumption and production) 6 (Energy consumption intensity) E4 (Companies without carbon reduction initiatives) E5 (Energy consumption per non-renewable energy source)	High risk for climate change without GHG emissions reporting and Paris-aligned reduction targets; Significant controversies
	Water	E6 (Water usage and recycling) E7 (Investments in companies with-out water management policies) E8 (Exposure to areas of high water stress)	High risk for water scarcity without activities to reduce freshwater use; Significant controversies
	Waste	E13 (Non-recycled waste ratio)	Significant controversies
	Pollution	8 (Emissions to water) 9 (Hazardous and radioactive waste ratio) E2 (Emissions of air pollutants)	Significant controversies
	Ecosystems	7 (Activities negatively affecting biodiversity) E11 (Companies without sustainable land/agriculture practice) E12 (Companies without sustainable oceans/seas practice) E15 (Deforestation)	High risk for human rights or conflict minerals without relevant policy and practices; Significant controversies
	Social	Human rights & community	S9 (Lack of human rights policy) S10 (Lack of human rights due diligence)
Labour practices		S1 (Companies without workplace accident prevention policies) S2 (Rate of accidents) S3 (Numbers of days lost to injuries, accidents, fatalities or illness) S4 (Lack of supplier code of conduct) 12 (Unadjusted gender pay gap) S5 (Lack of grievance/complaints mechanism for employee matters) S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights without relevant policies, targets and monitoring; Significant controversies
Supply chain management		S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights in the supply chain without relevant policies, targets and monitoring; Significant controversies
Governance		Corporate governance	13 (Board gender diversity) S8 (Excessive CEO pay ratio)
	Business ethics	S15 (Lack of anti-corruption and anti-bribery policies) S6 (Insufficient whistleblower protection)	Significant controversies

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

All investments made in 2022 were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Prior to being selected for investment and for the entire duration of the investment, (potential) investees are screened for compliance with the Minimum Standards. The Minimum Standards are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Alignment with the Minimum Standards is assessed in the second phase of the investment process through the check on controversies and the ESG assessment, based on data from external sources and additional in-house desk research (see above the answer to question 'How were the indicators for adverse impacts on sustainability factors taken into account?'). In case of significant violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (i.e. having severe impact, recurrence of incidents, lack of risk management and inadequate remediation measures), the investee is excluded from investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered all PAIs on sustainability factors referred to in the tables above. Every potential investment has been assessed using the relevant policies and if an issuer was found to cause significant harm, it was excluded from investment. PAIs have been continuously monitored to ensure the sub-fund remained compliant with our policies.

In 2022, continuous monitoring led to one company (Adecco) being excluded from the Triodos SICAV I investable universe due to an acquisition with involvement in weapons (relating to PAI indicator: Exposure to controversial weapons). As a result of the adverse impact, the holding was removed from Triodos Global Equities Impact Fund within three months.

The engagement efforts with investee companies aimed at minimising principal adverse impacts were focused on the PAI indicators related to greenhouse gas emissions, companies producing chemicals and excessive CEO pay ratio.

The list includes the investments constituting the greatest proportion of investments of the financial during the reference period which is: 2022

What were the top investments of this financial product?

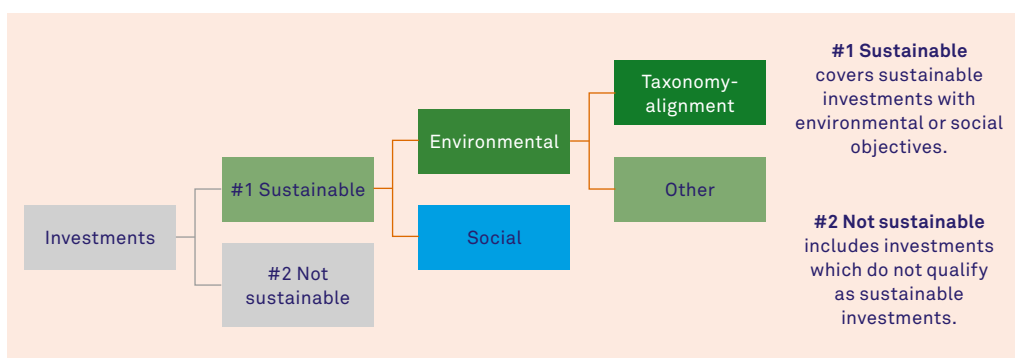

Largest investments	Sector	% Assets	Country
EssilorLuxottica	Manufacture of medical and dental instruments and supplies	3.7	France
Acciona Energías Renovables	Production of electricity	3.5	Spain
Vestas Wind Systems	Manufacture of engines and turbines, except aircraft, vehicle and cycle engines	3.5	Denmark
Anthem	Non-life insurance	3.5	United States
RELX	Data processing, hosting and related activities	3.3	Great Britain
Procter & Gamble	Manufacture of household and sanitary goods and of toilet requisites	3.1	United States
Deutsche Telekom	Wireless telecommunications activities	2.7	Germany
KDDI	Wireless telecommunications activities	2.6	Japan
NVIDIA	Manufacture of electronic components	2.6	United States
Novo Nordisk	Manufacture of basic pharmaceutical products	2.6	Denmark
Roche	Manufacture of basic pharmaceutical products	2.6	Switzerland
Danone	Operation of dairies and cheese making	2.5	France
Intuitive Surgical	Manufacture of medical and dental instruments and supplies	2.3	United States
Check Point Software Technologies	Other software publishing	2.3	Israel
Central Japan Railway	Passenger rail transport, interurban	2.2	Japan

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.2% of the net assets of the sub-fund were invested in sustainable investments as per 31 December 2022.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

In which economic sectors were the investments made?

Several new investments were done over the year 2022. The investments have been done across sectors related to:

- Manufacture of builders' ware of plastic
- Other software publishing
- Manufacture of other chemical products
- Manufacture of electronic components
- Publishing of books, periodicals and other publishing activities
- Manufacture of sports goods
- Trusts, funds and similar financial entities
- Manufacture of medical and dental instruments and supplies
- Other financial service activities, except insurance and pension funding n.e.c.
- Retail sale via mail order houses or via Internet
- Data processing, hosting and related activities
- Manufacture of household and sanitary goods and of toilet requisites

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:
 - climate change mitigation (8.3%)
 - climate change adaptation (0%)

As per 31 December 2022, 8.3% of the investments were Taxonomy aligned. The sub-fund did not have any sovereign exposures.

The Taxonomy percentages shown in the graphs below have not been subject to an assurance by an auditor or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas
 - In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2022, the sub-fund invested 3.0% of its investments in enabling activities and 1.7% in transitional activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As the reporting on Taxonomy alignment is only in place since this year, a comparison with the Taxonomy alignment figures of the previous reporting period will only be available in the annual report over 2023.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 97.6% as at 31 December 2022.

We do not steer on the percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Triodos transition themes, which are used for the positive selection of the investments, encompass more environmentally sustainable economic activities than currently covered by the EU Taxonomy. Presently, the EU Taxonomy focuses on certain sectors only, whereas the Triodos transition themes are sector-agnostic. The percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is likely to decrease over time as the remaining four Taxonomy objectives are finalised and more economic activities are added to the Taxonomy.

What was the share of socially sustainable investments?

The share of sustainable investments contributing to a social objective was 59.8% as at 31 December 2022.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund held 0.8% of its net assets in cash and cash equivalents as ancillary liquidity. Cash and cash equivalents did not affect the delivery of the sustainable investment objectives of the sub-fund on a continuous basis. Firstly, they were used - in limited proportion - to support the proper liquidity management of the sub-fund. Secondly, the Management Company assessed on a regular basis whether counterparties for cash and cash equivalents comply with the four pillars of the UN Global Compact, using data from a third-party provider. These four pillars consist of 1) human rights, 2) labour rights 3) environment and 4) anti-corruption. Also, the Management Company assessed its counterparties' policies and sustainability performance.

What actions have been taken to attain the sustainable investment objective during the reference period?

Triodos Global Equities Impact Fund invests in listed companies that materially contribute to the transition towards a sustainable society, through their products and services, or through their business practices. To maximize positive impact, we will continuously search for companies that fit in the transition themes. For example, Advanced Drainage was included in the portfolio during the reference period. The company is the 2nd largest plastics recycler and leading manufacturer of thermoplastic corrugated pipe in the US. Through its products, Advanced Drainage ensures the conservation of water and the provision of safe and affordable water management solutions. A clear fit for the Circular Economy theme and the environmental objective.

Supporting the social objective and a fit to the Prosperous & Healthy People theme was the inclusion of EssilorLuxottica in portfolio. EssilorLuxottica is one of the world's leading makers of ophthalmic lenses, frames, and sunglasses. Good vision is a basic human right and key lever for global development, but globally one in three people do not have access to the vision care they need. The company aims to eliminate poor vision in a generation, by finding ways to reach the 2.7 billion people that suffer from uncorrected poor vision and the 6.2 billion that do not protect their eyes from harmful rays. The company has created sustainable access to vision care in developing communities by establishing vision care businesses, which corrected or protected the vision of millions of people. The company raises awareness on the importance of vision protection, for example by aiding to draft the UN Resolution of Vision, and via its co-founded non-profit OneSight which provides free eye exams and eyeglasses to people in need. The company has a long history of innovation and leverages this capability to reduce its environmental impact, as demonstrated by development of the first bio-based acetate for glasses in the industry.

The position in Adecco was removed during the reference period. The company did not meet our minimum standards anymore after the acquisition of Akka Technologies. This was related to involvement in weapons (relating to PAI indicator: Exposure to controversial weapons). As a result of the adverse impact, the holding was removed from Triodos Global Equities Impact Fund.

Besides improving positive impact, the sub-fund's ecological footprint (portfolio CO₂ emitted, water consumed, waste produced) has been improved versus previous years, and lower than the footprint of the broader market.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Product name: Triodos Sterling Bond Impact Fund
Legal entity identifier: 549300UKN25V6QW6I076

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 30.3%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 49.0%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the sub-fund are to:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

The (environmental) objective to contribute to the transition to an economy within planetary boundaries is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Sustainable Mobility and Infrastructure (be mobile, live and work in a sustainable way)
- Renewable Resources (limit the use of finite resources)
- Circular Economy (make use of resources as efficiently and long as possible)
- Innovation for Sustainability (innovate for a sustainable future)

The (social) objective to contribute to the transition to an economy where all humans can enjoy a prosperous life is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Prosperous and Healthy People (become and stay healthy and happy)
- Social Inclusion and Empowerment (create a society in which all people can fully participate)
- Innovation for Sustainability (innovate for a sustainable future)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation
- climate change adaptation

The sub-fund realised its three sustainable investment objectives by investing in listed bonds that actively contribute to at least one transition theme. To support proper liquidity and risk management, the sub-fund holds cash and may invest in regular sovereign bonds up to 25% of its net assets. At year-end, the share of cash and regular sovereign bonds amounted to 20.7%.

How did the sustainability indicators perform?

In order to measure the attainment of its sustainable investment objectives, the sub-fund measures its exposure to the Triodos transition themes as a percentage of portfolio holdings that contribute to at least one transition theme and as a percentage of assets under management allocated to each theme. Since each Triodos transition theme is linked to one or more UN Sustainable Development Goals (SDGs), the sub-fund also reports its absolute and relative contribution to environmental (SDGs 6, 7, 11, 12, 13 and 15) or social (SDGs 1, 2, 3, 4, 5, 10 and 16) SDGs based on external data performing a comprehensive assessment of company products and services that affect SDGs. The contribution is measured by SDG scores, which range on a scale from -10 (products/services having a significant obstructing impact to the SDGs) to 10 (products/services having a significant contributing impact to the SDGs). The sub-fund also reports its carbon footprint relative to its benchmark (scope 1 and 2 emissions). The benchmark of the sub-fund (used for performance measurement only) is Bloomberg Barclays UK Gilt 1-5 year Total Return Unhedged GBP index (50%) and Bloomberg Barclays Sterling Non-Gilts Total Return Value Unhedged GBP index (50%).

In 2022, all investments contributed to at least one of the transition themes. Five transition themes were represented in the sub-fund (Sustainable Mobility and Infrastructure, Social Inclusion and Empowerment, Prosperous and Healthy People, Renewable Resources and Sustainable Food and Agriculture) with the largest exposure at year-end to Social Inclusion and Empowerment (40.1% of NAV).

The contribution of the sub-fund to the SDGs was significantly higher than that of the benchmark. The sub-fund particularly contributed to SDG10, SDG11 and SDG13.

	Sub-fund	Benchmark
Environmental SDGs	4.4	0.2
Social SDGs	1.5	0.2

Source: ISS SDG Product & Services Score as of 31 December 2022

The carbon footprint of the sub-fund was lower than that of the benchmark:

	Sub-fund	Benchmark
Carbon footprint (tonnes of CO ₂ equivalent)	128	562

Source: ISS as of 31 December 2022

The performance of the indicators is a consequence of the investment strategy of the sub-funds and not a result of targeting specific indicator results. The data used to calculate the performance of the sustainability indicators is derived by the Management Company from companies directly and/or via data providers and have not been subject to an assurance by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

...and compared to previous periods?

Compared to 2021, the contribution of the sub-fund to the transition themes has changed as follows:

	31 December 2022	31 December 2021
Social Inclusion and Empowerment	40.1%	30.1%
Prosperous and Healthy People	6.1%	9.1%
Sustainable Food and Agriculture	3.9%	0.0%
Renewable Resources	10.4%	6.9%
Circular Economy	0.0%	0.0%
Innovation for Sustainability	0.0%	0.0%
Sustainable Mobility and Infrastructure	18.9%	19.7%
Cash	1.7%	2.6%
Regular (sub-)sovereign bonds	19.0%	31.6%

The contribution of the sub-fund to the SDGs as at 31 December 2022 was higher than as at 31 December 2021:

	31 December 2022	31 December 2021
Environmental SDGs	4.4	2.9
Social SDGs	1.5	1.1

The relative carbon footprint of the sub-fund was lower as at 31 December 2022 than as at 31 December 2021:

	31 December 2022	31 December 2021
Carbon footprint (tonnes of CO ₂ equivalent)	-77.2%	-85.3%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To select only those investments that do not cause significant harm to any environmental or social sustainable investment objective, every (new) investment has been assessed on its alignment with the Minimum Standards or the Sovereign Framework (depending on the type of instrument). If an issuer was found to cause significant harm to any of those standards, it was excluded from investment. All applicable PAIs on sustainability factors have been taken into account in the investment process. The Minimum Standards, that are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, also set out the minimum standards for employee relations, remuneration, taxes and other corporate governance topics that investees must meet in order to be eligible for investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

With the introduction of the SFDR Delegated Regulation as from 1 January 2023, PAIs have been introduced to establish standards for reporting on principal adverse impacts. The process for taking into account PAIs as applied from 1 January 2023 is detailed below. In 2022, all investments of the sub-fund were screened against the Minimum Standards or the Sovereign Framework to avoid or reduce principal adverse impacts when investing.

For instruments issued by companies (e.g. shares, corporate bonds, impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact, consisting of three steps), both as part of the initial screening and the continuous monitoring of investments:

1. Negative screening: Every (potential) investee has been screened for involvement in controversial business activities. If an investee exceeded the threshold below, “high concern” was concluded, and the investee was excluded from investment.

Triodos controversial activity	SFDR PAI	Threshold
Controversial weapons	14 (Exposure to controversial weapons)	Any involvement
Fossil fuels	4 (Exposure to companies active in the fossil fuel sector)	GICS Energy Sector classification (i.e. companies active in the fossil fuel sector)
Hazardous substances	E9 (Investments in companies producing chemicals)	Pesticides – production, distribution (>5% revenue) Persistent Organic Pollutants – production, use (>0% revenue)

2. Controversies: Every (potential) investee has been assessed on violations of UN Global Compact and OECD Guidelines for Multinational Enterprises on a case-by-case basis considering violations in the last three years. Per case, the verification of information, severity and company response were considered to conclude if a case was low, medium or high concern. In case a company had been involved in severe and/or frequent violations without taking credible remediation measures, “high concern” was concluded, and the investee was excluded from investment.

Triodos assessment	SFDR PAI	Threshold
Controversies	10 (Violations of UN Global Compact principles and OECD Guidelines) 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines) S7 (Incidents of discrimination) S14 (Number of severe human rights issues and incidents) S16 (Cases of insufficient action with breaches of anti-corruption) S17 (Convictions and fines for anti-corruption)	Significant violations of UN Global Compact or OECD Guidelines within the last 3 years

3. ESG assessment: By combining our proprietary materiality map, highlighting material ESG issues per industry, with an understanding of the company’s actual business activities, the risk that an investee inflicts negative impacts on these ESG issues has been assessed. Based on the risk classification (low, medium or high risk), the company must have met additional requirements such as having sustainability programs, reporting, certifications, policies or practices in place. In case a company did not meet these requirements but was in transition, it was flagged for engagement. The PAI indicators were considered on an absolute basis, over time and compared to five peers (where relevant). Taking all of the above into consideration, a company’s practices were assessed as low, medium or high concern. If “high concern” was concluded, the investee was excluded from investment.

Triodos			
ESG issue		SFDR PAI	Threshold
Environmental	Climate change	1 (GHG emissions) 2 (Carbon footprint) 3 (GHG intensity) 5 (Share of non-renewable energy consumption and production) 6 (Energy consumption intensity) E4 (Companies without carbon reduction initiatives) E5 (Energy consumption per non-renewable energy source)	High risk for climate change without GHG emissions reporting and Paris-aligned reduction targets; Significant controversies
	Water	E6 (Water usage and recycling) E7 (Investments in companies with-out water management policies) E8 (Exposure to areas of high water stress)	High risk for water scarcity without activities to reduce freshwater use; Significant controversies
	Waste	E13 (Non-recycled waste ratio)	Significant controversies
	Pollution	8 (Emissions to water) 9 (Hazardous and radioactive waste ratio) E2 (Emissions of air pollutants)	Significant controversies
	Ecosystems	7 (Activities negatively affecting biodiversity) E11 (Companies without sustainable land/agriculture practice) E12 (Companies without sustainable oceans/seas practice) E15 (Deforestation)	High risk for human rights or conflict minerals without relevant policy and practices; Significant controversies
	Social	Human rights & community	S9 (Lack of human rights policy) S10 (Lack of human rights due diligence)
Labour practices		S1 (Companies without workplace accident prevention policies) S2 (Rate of accidents) S3 (Numbers of days lost to injuries, accidents, fatalities or illness) S4 (Lack of supplier code of conduct) 12 (Unadjusted gender pay gap) S5 (Lack of grievance/complaints mechanism for employee matters) S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights without relevant policies, targets and monitoring; Significant controversies
Supply chain management		S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights in the supply chain without relevant policies, targets and monitoring; Significant controversies
Governance		Corporate governance	13 (Board gender diversity) S8 (Excessive CEO pay ratio)
	Business ethics	S15 (Lack of anti-corruption and anti-bribery policies) S6 (Insufficient whistleblower protection)	Significant controversies

For instruments issued by sovereigns (e.g. impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact), both as part of the initial screening and the continuous monitoring of investments:

Triodos ESG issue	SFDR PAI	Threshold
Environmental	15 (GHG intensity)	Ratification of: <ul style="list-style-type: none">• Paris Convention• Framework Convention on Climate Change• Kyoto Protocol
Governance	16 (Investee countries subject to social violations)	<ul style="list-style-type: none">• Ratification of international controversial weapons conventions• United Nations and European Union sanctions

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

All investments made in 2022 were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Prior to being selected for investment and for the entire duration of the investment, (potential) investees are screened for compliance with the Minimum Standards. The Minimum Standards are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Alignment with the Minimum Standards is assessed in the second phase of the investment process through the check on controversies and the ESG assessment, based on data from external sources and additional in-house desk research (see above the answer to question 'How were the indicators for adverse impacts on sustainability factors taken into account?'). In case of significant violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (i.e. having severe impact, recurrence of incidents, lack of risk management and inadequate remediation measures), the investee is excluded from investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered all PAIs on sustainability factors referred to in the tables above. Every potential investment has been assessed using the relevant policies and if an issuer was found to cause significant harm, it was excluded from investment. PAIs have been continuously monitored to ensure the sub-fund remained compliant with our policies.

In 2022, continuous monitoring led to one company (Adecco) being excluded from the Triodos SICAV I investable universe due to an acquisition with involvement in weapons (relating to PAI indicator: Exposure to controversial weapons).

The engagement efforts with investee companies aimed at minimising principal adverse impacts were focused on the PAI indicators related to greenhouse gas emissions, companies producing chemicals and excessive CEO pay ratio.

The list includes the investments constituting the greatest proportion of investments of the financial during the reference period which is: 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
United Kingdom	General public administration activities	8.6	Great Britain
United Kingdom	General public administration activities	5.4	Great Britain
Agence Française de Développement	Monetary intermediation	4.7	France
Council Of Europe Development Bank	Activities of extraterritorial organisations and bodies	4.6	France
European Investment Bank	Activities of extraterritorial organisations and bodies	4.2	Luxembourg
Bank Nederlandse Gemeenten	Monetary intermediation	4.0	Netherlands

Henkel	Manufacture of soap and detergents, cleaning and polishing preparations, perfumes and toilet preparations	2.8	Germany
Anglian Water	Water collection, treatment and supply	2.8	Great Britain

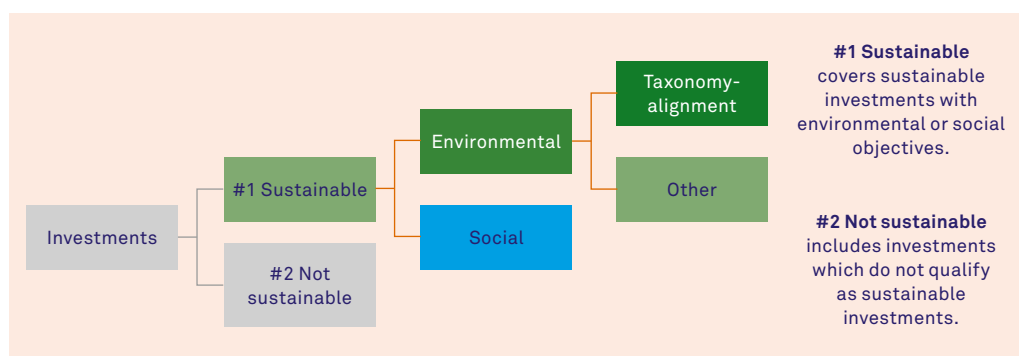

Source (Sector): NACE5

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

79.3% of the net assets of the sub-fund were invested in sustainable investments as per 31 December 2022.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

In which economic sectors were the investments made?

Several new investments were done over the year 2022. The investments have been done across sectors related to:

- Monetary intermediation
- Publishing of books, periodicals and other publishing activities
- Rental and operating of own or leased real estate
- Water collection, treatment and supply
- Wireless telecommunications activities
- Manufacture of soap and detergents, cleaning and polishing preparations
- Manufacture of household and sanitary goods and of toilet requisites

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributes to the following environmental objectives as set out in article 9 of the EU Taxonomy:
 - climate change mitigation (10.4%)
 - climate change adaptation (0%)

As per 31 December 2022, 10.4% of the investments were Taxonomy aligned. The sub-fund had exposure to impact bonds issued by sub-sovereigns and regular (sub-)sovereign bonds.

The Taxonomy percentages shown in the graphs below have not been subject to an assurance by an auditor or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

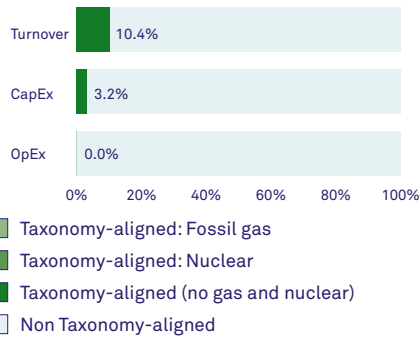

- Yes
- In fossil gas
 - In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2022, the sub-fund invested 0.0% of its investments in enabling activities and 3.1% in transitional activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As the reporting on Taxonomy alignment is only in place since this year, a comparison with the Taxonomy alignment figures of the previous reporting period will only be available in the annual report over 2023.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 94.2% as at 31 December 2022.

We do not steer on the percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Triodos transition themes, which are used for the positive selection of the investments, encompass more environmentally sustainable economic activities than currently covered by the EU Taxonomy. Presently, the EU Taxonomy focusses on certain sectors only, whereas the Triodos transition themes are sector-agnostic. The percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is likely to decrease over time as the remaining four Taxonomy objectives are finalised and more economic activities are added to the Taxonomy.

What was the share of socially sustainable investments?

The share of sustainable investments contributing to a social objective was 49.0% as at 31 December 2022.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund held 20.7% of its net assets in regular sovereign bonds and cash and cash equivalents as ancillary liquidity. These investments did not affect the delivery of the sustainable investment objectives of the sub-fund on a continuous basis. Firstly, they were used to support the proper liquidity management of the sub-fund. Secondly, sovereign bonds adhere to minimum environmental or social safeguards through the application of the Sovereign Framework. Thirdly, the Management Company assessed on a regular basis whether counterparties for cash and cash equivalents comply with the four pillars of the UN Global Compact, using data from a third-party provider. These four pillars consist of 1) human rights, 2) labour rights 3) environment and 4) anti-corruption. Also, the Management Company assessed its counterparties' policies and sustainability performance.

What actions have been taken to attain the sustainable investment objective during the reference period?

In 2022, company contact took place with eleven issuers in the sub-fund. With six issuers environmental performance was discussed, with four issuers social performance was discussed and with three issuers governance issues were discussed. For example, with Prologis contact took place to discuss their remuneration policy. With Toyota Motor multiple contact took place to discuss allegations about their lobby activities and climate change. In both cases, the response of the company was deemed sufficient and they could be maintained in the investment universe and portfolio of the sub-fund.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Product name: Triodos Impact Mixed Fund - Defensive
Legal entity identifier: 549300T067ZBR87FH855

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 50.1% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 48.6%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the sub-fund are to:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

The (environmental) objective to contribute to the transition to an economy within planetary boundaries is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Sustainable Mobility and Infrastructure (be mobile, live and work in a sustainable way)
- Renewable Resources (limit the use of finite resources)
- Circular Economy (make use of resources as efficiently and long as possible)
- Innovation for Sustainability (innovate for a sustainable future)

The (social) objective to contribute to the transition to an economy where all humans can enjoy a prosperous life is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Prosperous and Healthy People (become and stay healthy and happy)
- Social Inclusion and Empowerment (create a society in which all people can fully participate)
- Innovation for Sustainability (innovate for a sustainable future)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation
- climate change adaptation

The sub-fund realised its three sustainable investment objectives by investing solely in listed equities that actively contribute to at least one transition theme.

How did the sustainability indicators perform?

In order to measure the attainment of its sustainable investment objectives, the sub-fund measures its exposure to the Triodos transition themes as a percentage of portfolio holdings that contribute to at least one transition theme and as a percentage of assets under management allocated to each theme. Since each Triodos transition theme is linked to one or more UN Sustainable Development Goals (SDGs), the sub-fund also reports its absolute and relative contribution to environmental (SDGs 6, 7, 11, 12, 13 and 15) or social (SDGs 1, 2, 3, 4, 5, 10 and 16) SDGs based on external data performing a comprehensive assessment of company products and services that affect SDGs. The contribution is measured by SDG scores, which range on a scale from -10 (products/services having a significant obstructing impact to the SDGs) to 10 (products/services having a significant contributing impact to the SDGs). The sub-fund also reports its carbon footprint relative to its benchmark (scope 1 and 2 emissions). The benchmark of the sub-fund (used for performance measurement only) is MSCI World Index (25%), iBoxx Euro Corporates Overall Total Return (45%) and iBoxx Euro Eurozone Sovereign 1-10 Total Return (30%).

In 2022, all investments contributed to at least one of the transition themes. All seven transition themes were represented in the sub-fund with the largest exposure at year-end to Sustainable Mobility and Infrastructure (34.1% of NAV).

The contribution of the sub-fund to the SDGs was significantly higher than that of the benchmark. The sub-fund particularly contributed to SDG3, SDG10 and SDG11

	Sub-fund	Benchmark
Environmental SDGs	1.6	-0.2
Social SDGs	2.9	0.6

Source: ISS SDG Product & Services Score as of 31 December 2022

The carbon footprint of the sub-fund was lower than that of the benchmark:

	Sub-fund	Benchmark
Carbon footprint (tonnes of CO ₂ equivalent)	1,098	1,932

Source: ISS as of 31 December 2022

The performance of the indicators is a consequence of the investment strategy of the sub-funds and not a result of targeting specific indicator results. The data used to calculate the performance of the sustainability indicators is derived by the Management Company from companies directly and/or via data providers and have not been subject to an assurance by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

...and compared to previous periods?

Compared to 2021, the contribution of the sub-fund to the transition themes has changed as follows:

	31 December 2022	31 December 2021
Social Inclusion and Empowerment	25.8%	22.8%
Prosperous and Healthy People	16.2%	13.0%
Sustainable Food and Agriculture	3.9%	3.6%
Renewable Resources	9.0%	7.4%
Circular Economy	1.7%	1.3%
Innovation for Sustainability	7.9%	7.0%
Sustainable Mobility and Infrastructure	34.1%	28.0%
Cash	1.3%	3.1%
Regular (sub-)sovereign bonds	–	13.7%

The contribution of the sub-fund to the SDGs as at 31 December 2022 was higher than as at 31 December 2021:

	31 December 2022	31 December 2021
Environmental SDGs	1.6	0.9
Social SDGs	2.9	2.4

The relative carbon footprint of the sub-fund was lower as at 31 December 2022 than as at 31 December 2021:

	31 December 2022	31 December 2021
Carbon footprint (tonnes of CO ₂ equivalent)	-43.2%	-31.1%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To select only those investments that do not cause significant harm to any environmental or social sustainable investment objective, every (new) investment has been assessed on its alignment with the Minimum Standards or the Sovereign Framework (depending on the type of instrument). If an issuer was found to cause significant harm to any of those standards, it was excluded from investment. All applicable PAIs on sustainability factors have been taken into account in the investment process. The Minimum Standards, that are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, also set out the minimum standards for employee relations, remuneration, taxes and other corporate governance topics that investees must meet in order to be eligible for investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

With the introduction of the SFDR Delegated Regulation as from 1 January 2023, PAIs have been introduced to establish standards for reporting on principal adverse impacts. The process for taking into account PAIs as applied from 1 January 2023 is detailed below. In 2022, all investments of the sub-fund were screened against the Minimum Standards or the Sovereign Framework to avoid or reduce principal adverse impacts when investing.

For instruments issued by companies (e.g. shares, corporate bonds, impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact, consisting of three steps), both as part of the initial screening and the continuous monitoring of investments:

1. Negative screening: Every (potential) investee has been screened for involvement in controversial business activities. If an investee exceeded the threshold below, “high concern” was concluded, and the investee was excluded from investment.

Triodos controversial activity	SFDR PAI	Threshold
Controversial weapons	14 (Exposure to controversial weapons)	Any involvement
Fossil fuels	4 (Exposure to companies active in the fossil fuel sector)	GICS Energy Sector classification (i.e. companies active in the fossil fuel sector)
Hazardous substances	E9 (Investments in companies producing chemicals)	Pesticides – production, distribution (>5% revenue) Persistent Organic Pollutants – production, use (>0% revenue)

2. Controversies: Every (potential) investee has been assessed on violations of UN Global Compact and OECD Guidelines for Multinational Enterprises on a case-by-case basis considering violations in the last three years. Per case, the verification of information, severity and company response were considered to conclude if a case was low, medium or high concern. In case a company had been involved in severe and/or frequent violations without taking credible remediation measures, “high concern” was concluded, and the investee was excluded from investment.

Triodos assessment	SFDR PAI	Threshold
Controversies	10 (Violations of UN Global Compact principles and OECD Guidelines) 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines) S7 (Incidents of discrimination) S14 (Number of severe human rights issues and incidents) S16 (Cases of insufficient action with breaches of anti-corruption) S17 (Convictions and fines for anti-corruption)	Significant violations of UN Global Compact or OECD Guidelines within the last 3 years

3. ESG assessment: By combining our proprietary materiality map, highlighting material ESG issues per industry, with an understanding of the company’s actual business activities, the risk that an investee inflicts negative impacts on these ESG issues has been assessed. Based on the risk classification (low, medium or high risk), the company must have met additional requirements such as having sustainability programs, reporting, certifications, policies or practices in place. In case a company did not meet these requirements but was in transition, it was flagged for engagement. The PAI indicators were considered on an absolute basis, over time and compared to five peers (where relevant). Taking all of the above into consideration, a company’s practices were assessed as low, medium or high concern. If “high concern” was concluded, the investee was excluded from investment.

Triodos			
ESG issue		SFDR PAI	Threshold
Environmental	Climate change	1 (GHG emissions) 2 (Carbon footprint) 3 (GHG intensity) 5 (Share of non-renewable energy consumption and production) 6 (Energy consumption intensity) E4 (Companies without carbon reduction initiatives) E5 (Energy consumption per non-renewable energy source)	High risk for climate change without GHG emissions reporting and Paris-aligned reduction targets; Significant controversies
	Water	E6 (Water usage and recycling) E7 (Investments in companies with-out water management policies) E8 (Exposure to areas of high water stress)	High risk for water scarcity without activities to reduce freshwater use; Significant controversies
	Waste	E13 (Non-recycled waste ratio)	Significant controversies
	Pollution	8 (Emissions to water) 9 (Hazardous and radioactive waste ratio) E2 (Emissions of air pollutants)	Significant controversies
	Ecosystems	7 (Activities negatively affecting biodiversity) E11 (Companies without sustainable land/agriculture practice) E12 (Companies without sustainable oceans/seas practice) E15 (Deforestation)	High risk for human rights or conflict minerals without relevant policy and practices; Significant controversies
	Social	Human rights & community	S9 (Lack of human rights policy) S10 (Lack of human rights due diligence)
Labour practices		S1 (Companies without workplace accident prevention policies) S2 (Rate of accidents) S3 (Numbers of days lost to injuries, accidents, fatalities or illness) S4 (Lack of supplier code of conduct) 12 (Unadjusted gender pay gap) S5 (Lack of grievance/complaints mechanism for employee matters) S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights without relevant policies, targets and monitoring; Significant controversies
Supply chain management		S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights in the supply chain without relevant policies, targets and monitoring; Significant controversies
Governance		Corporate governance	13 (Board gender diversity) S8 (Excessive CEO pay ratio)
	Business ethics	S15 (Lack of anti-corruption and anti-bribery policies) S6 (Insufficient whistleblower protection)	Significant controversies

For instruments issued by sovereigns (e.g. impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact), both as part of the initial screening and the continuous monitoring of investments:

Triodos ESG issue	SFDR PAI	Threshold
Environmental	15 (GHG intensity)	Ratification of: <ul style="list-style-type: none">• Paris Convention• Framework Convention on Climate Change• Kyoto Protocol
Governance	16 (Investee countries subject to social violations)	<ul style="list-style-type: none">• Ratification of international controversial weapons conventions• United Nations and European Union sanctions

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

All investments made in 2022 were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Prior to being selected for investment and for the entire duration of the investment, (potential) investees are screened for compliance with the Minimum Standards. The Minimum Standards are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Alignment with the Minimum Standards is assessed in the second phase of the investment process through the check on controversies and the ESG assessment, based on data from external sources and additional in-house desk research (see above the answer to question 'How were the indicators for adverse impacts on sustainability factors taken into account?'). In case of significant violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (i.e. having severe impact, recurrence of incidents, lack of risk management and inadequate remediation measures), the investee is excluded from investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered all PAIs on sustainability factors referred to in the tables above. Every potential investment has been assessed using the relevant policies and if an issuer was found to cause significant harm, it was excluded from investment. PAIs have been continuously monitored to ensure the sub-fund remained compliant with our policies.

In 2022, continuous monitoring led to one company (Adecco) being excluded from the Triodos SICAV I investable universe due to an acquisition with involvement in weapons (relating to PAI indicator: Exposure to controversial weapons).

The engagement efforts with investee companies aimed at minimising principal adverse impacts were focused on the PAI indicators related to greenhouse gas emissions, companies producing chemicals and excessive CEO pay ratio.

The list includes the investments constituting the greatest proportion of investments of the financial during the reference period which is: 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
German Government bond	General public administration activities	3.1	Germany
German Government bond	General public administration activities	2.3	Germany
European Union	Activities of extraterritorial organisations and bodies	2.3	Belgium
European Union	Activities of extraterritorial organisations and bodies	2.2	Belgium
European Union	Activities of extraterritorial organisations and bodies	2.1	Belgium
European Union	Activities of extraterritorial organisations and bodies	1.9	Belgium
Ireland	General public administration activities	1.7	Ireland
German Government bond	General public administration activities	1.6	Germany
European Union	Activities of extraterritorial organisations and bodies	1.6	Belgium

Madrid	General public administration activities	1.0	Spain

Source (Sector): NACE5

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.7% of the net assets of the sub-fund were invested in sustainable investments as per 31 December 2022.

In which economic sectors were the investments made?

Several new investments were done over the year 2022. The investments have been done across sectors related to:

- Manufacture of builders' ware of plastic
- Rental and operating of own or leased real estate

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- Other software publishing
- Manufacture of other pumps and compressors
- Manufacture of medical and dental instruments and supplies
- Manufacture of electronic components
- Manufacture of other chemical products
- General public administration activities
- Publishing of books, periodicals and other publishing activities
- Transmission of electricity
- Manufacture of sports goods
- Manufacture of electronic components
- Other financial service activities, except insurance and pension funding
- Water collection, treatment and supply
- Passenger rail transport, interurban
- Other financial service activities, except insurance and pension funding n.e.c.
- Data processing, hosting and related activities
- Production of electricity
- Manufacture of other parts and accessories for motor vehicles
- Retail sale via mail order houses or via Internet
- Data processing, hosting and related activities
- Manufacture of household and sanitary goods and of toilet requisites

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributes to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation (2.9%)
- climate change adaptation (0%)

As per 31 December 2022, 2.9% of the investments were Taxonomy aligned. The sub-fund had exposure to impact bonds issued by (sub-)sovereigns.

The Taxonomy percentages shown in the graphs below have not been subject to an assurance by an auditor or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2022, the sub-fund invested 0.8% of its investments in enabling activities and 0.9% in transitional activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As the reporting on Taxonomy alignment is only in place since this year, a comparison with the Taxonomy alignment figures of the previous reporting period will only be available in the annual report over 2023.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 90.0% as at 31 December 2022.

We do not steer on the percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Triodos transition themes, which are used for the positive selection of the investments, encompass more environmentally sustainable economic activities than currently covered by the EU Taxonomy. Presently, the EU Taxonomy focusses on certain sectors only, whereas the Triodos transition themes are sector-agnostic. The percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is likely to decrease over time as the remaining four Taxonomy objectives are finalised and more economic activities are added to the Taxonomy.

What was the share of socially sustainable investments?

The share of sustainable investments contributing to a social objective was 48.6% as at 31 December 2022.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund held 1.3% of its net assets in cash and cash equivalents as ancillary liquidity. Cash and cash equivalents did not affect the delivery of the sustainable investment objectives of the sub-fund on a continuous basis. Firstly, they were used - in limited proportion - to support the proper liquidity management of the sub-fund. Secondly, the Management Company assessed on a regular basis whether counterparties for cash and cash equivalents comply with the four pillars of the UN Global Compact, using data from a third-party provider. These four pillars consist of 1) human rights, 2) labour rights 3) environment and 4) anti-corruption. Also, the Management Company assessed its counterparties' policies and sustainability performance.

What actions have been taken to attain the sustainable investment objective during the reference period?

Triodos Impact Mixed Fund – Defensive improved its positive impact profile further in 2022. We exchanged a series of smaller and low conviction equity holdings for high impact positions; KLA (semiconductor equipment), Akamai (internet hardware and services), Shimano (bicycle parts), Nvidia (processors and software), DSM (ingredients), EssilorLuxottica (eyewear), Sonova (hearing equipment), Adyen (on-line payments), Mastercard (payment systems) and Ebay (trading platform).

Also, in fixed income we improved the impact of the fund. New additions included RTE (French electricity grid), Royal DSM (ingredients), Aedifica (housing), Kuntarahoitus (Finland) impact bond, Coloplast (medical equipment), ALD green bond (leasing fleet), Essilor (eyewear), Cades (French social institution), Suez (environmental services), Ferrovie dello State Italiane (Italian railways), ICO (Spanish social institution), EU social bonds, Madrid green bond, Statkraft (renewable energy), Continental (energy efficiency) and green bonds issued by the governments of France, Austria and Germany.

A major improvement in terms of impact is the fact that we have exchanged all regular government bonds for impact government(-related) issues. At year-end all fixed income investments of Triodos Impact Mixed Fund - Defensive were thematic and in line with a least one of the seven Triodos sustainable transition themes.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Product name: Triodos Impact Mixed Fund - Neutral
Legal entity identifier: 549300F21J6UWEJ11S34

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 45.6% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 53.5%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the sub-fund are to:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

The (environmental) objective to contribute to the transition to an economy within planetary boundaries is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Sustainable Mobility and Infrastructure (be mobile, live and work in a sustainable way)
- Renewable Resources (limit the use of finite resources)
- Circular Economy (make use of resources as efficiently and long as possible)
- Innovation for Sustainability (innovate for a sustainable future)

The (social) objective to contribute to the transition to an economy where all humans can enjoy a prosperous life is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Prosperous and Healthy People (become and stay healthy and happy)
- Social Inclusion and Empowerment (create a society in which all people can fully participate)
- Innovation for Sustainability (innovate for a sustainable future)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation
- climate change adaptation

The sub-fund realised its three sustainable investment objectives by investing solely in listed equities that actively contribute to at least one transition theme.

How did the sustainability indicators perform?

In order to measure the attainment of its sustainable investment objectives, the sub-fund measures its exposure to the Triodos transition themes as a percentage of portfolio holdings that contribute to at least one transition theme and as a percentage of assets under management allocated to each theme. Since each Triodos transition theme is linked to one or more UN Sustainable Development Goals (SDGs), the sub-fund also reports its absolute and relative contribution to environmental (SDGs 6, 7, 11, 12, 13 and 15) or social (SDGs 1, 2, 3, 4, 5, 10 and 16) SDGs based on external data performing a comprehensive assessment of company products and services that affect SDGs. The contribution is measured by SDG scores, which range on a scale from -10 (products/services having a significant obstructing impact to the SDGs) to 10 (products/services having a significant contributing impact to the SDGs). The sub-fund also reports its carbon footprint relative to its benchmark (scope 1 and 2 emissions). The benchmark of the sub-fund (used for performance measurement only) is MSCI World Index (50%), iBoxx Euro Corporates Overall Total Return (30%) and iBoxx Euro Eurozone Sovereign 1-10 Total Return (20%).

In 2022, all investments contributed to at least one of the transition themes. All seven transition themes were represented in the sub-fund with the largest exposure at year-end to Social Inclusion and Empowerment (23.3% of NAV).

The contribution of the sub-fund to the SDGs was significantly higher than that of the benchmark. The sub-fund particularly contributed to SDG3, SDG11 and SDG13.

	Sub-fund	Benchmark
Environmental SDGs	1.7	-0.2
Social SDGs	3.0	0.8

Source: ISS SDG Product & Services Score as of 31 December 2022

The carbon footprint of the sub-fund was lower than that of the benchmark:

	Sub-fund	Benchmark
Carbon footprint (tonnes of CO ₂ equivalent)	18,121	32,966

Source: ISS as of 31 December 2022

The performance of the indicators is a consequence of the investment strategy of the sub-funds and not a result of targeting specific indicator results. The data used to calculate the performance of the sustainability indicators is derived by the Management Company from companies directly and/or via data providers and have not been subject to an assurance by an auditor or a review by a third party.

...and compared to previous periods?

Compared to 2021, the contribution of the sub-fund to the transition themes has changed as follows:

	31 December 2022	31 December 2021
Social Inclusion and Empowerment	23.3%	17.9%
Prosperous and Healthy People	19.7%	18.7%
Sustainable Food and Agriculture	5.0%	3.9%
Renewable Resources	6.8%	5.2%
Circular Economy	2.2%	1.7%
Innovation for Sustainability	11.9%	11.2%
Sustainable Mobility and Infrastructure	28.2%	24.8%
Cash	0.7%	2.8%
Regular (sub-)sovereign bonds	–	11.2%
Other	2.3%	2.7%

The contribution of the sub-fund to the SDGs as at 31 December 2022 was higher than as at 31 December 2021:

	31 December 2022	31 December 2021
Environmental SDGs	1.7	1.3
Social SDGs	3.0	2.5

The relative carbon footprint of the sub-fund was lower as at 31 December 2022 than as at 31 December 2021:

	31 December 2022	31 December 2021
Carbon footprint (tonnes of CO ₂ equivalent)	-45.0%	-21.9%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To select only those investments that do not cause significant harm to any environmental or social sustainable investment objective, every (new) investment has been assessed on its alignment with the Minimum Standards or the Sovereign Framework (depending on the type of instrument). If an issuer was found to cause significant harm to any of those standards, it was excluded from investment. All applicable PAIs on sustainability factors have been taken into account in the investment process. The Minimum Standards, that are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, also set out the minimum standards for employee relations, remuneration, taxes and other corporate governance topics that investees must meet in order to be eligible for investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

With the introduction of the SFDR Delegated Regulation as from 1 January 2023, PAIs have been introduced to establish standards for reporting on principal adverse impacts. The process for taking into account PAIs as applied from 1 January 2023 is detailed below. In 2022, all investments of the sub-fund were screened against the Minimum Standards or the Sovereign Framework to avoid or reduce principal adverse impacts when investing.

For instruments issued by companies (e.g. shares, corporate bonds, impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact, consisting of three steps), both as part of the initial screening and the continuous monitoring of investments:

1. Negative screening: Every (potential) investee has been screened for involvement in controversial business activities. If an investee exceeded the threshold below, “high concern” was concluded, and the investee was excluded from investment.

Triodos controversial activity	SFDR PAI	Threshold
Controversial weapons	14 (Exposure to controversial weapons)	Any involvement
Fossil fuels	4 (Exposure to companies active in the fossil fuel sector)	GICS Energy Sector classification (i.e. companies active in the fossil fuel sector)
Hazardous substances	E9 (Investments in companies producing chemicals)	Pesticides – production, distribution (>5% revenue) Persistent Organic Pollutants – production, use (>0% revenue)

2. Controversies: Every (potential) investee has been assessed on violations of UN Global Compact and OECD Guidelines for Multinational Enterprises on a case-by-case basis considering violations in the last three years. Per case, the verification of information, severity and company response were considered to conclude if a case was low, medium or high concern. In case a company had been involved in severe and/or frequent violations without taking credible remediation measures, “high concern” was concluded, and the investee was excluded from investment.

Triodos assessment	SFDR PAI	Threshold
Controversies	10 (Violations of UN Global Compact principles and OECD Guidelines) 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines) S7 (Incidents of discrimination) S14 (Number of severe human rights issues and incidents) S16 (Cases of insufficient action with breaches of anti-corruption) S17 (Convictions and fines for anti-corruption)	Significant violations of UN Global Compact or OECD Guidelines within the last 3 years

3. ESG assessment: By combining our proprietary materiality map, highlighting material ESG issues per industry, with an understanding of the company’s actual business activities, the risk that an investee inflicts negative impacts on these ESG issues has been assessed. Based on the risk classification (low, medium or high risk), the company must have met additional requirements such as having sustainability programs, reporting, certifications, policies or practices in place. In case a company did not meet these requirements but was in transition, it was flagged for engagement. The PAI indicators were considered on an absolute basis, over time and compared to five peers (where relevant). Taking all of the above into consideration, a company’s practices were assessed as low, medium or high concern. If “high concern” was concluded, the investee was excluded from investment.

Triodos			
ESG issue		SFDR PAI	Threshold
Environmental	Climate change	1 (GHG emissions) 2 (Carbon footprint) 3 (GHG intensity) 5 (Share of non-renewable energy consumption and production) 6 (Energy consumption intensity) E4 (Companies without carbon reduction initiatives) E5 (Energy consumption per non-renewable energy source)	High risk for climate change without GHG emissions reporting and Paris-aligned reduction targets; Significant controversies
	Water	E6 (Water usage and recycling) E7 (Investments in companies with-out water management policies) E8 (Exposure to areas of high water stress)	High risk for water scarcity without activities to reduce freshwater use; Significant controversies
	Waste	E13 (Non-recycled waste ratio)	Significant controversies
	Pollution	8 (Emissions to water) 9 (Hazardous and radioactive waste ratio) E2 (Emissions of air pollutants)	Significant controversies
	Ecosystems	7 (Activities negatively affecting biodiversity) E11 (Companies without sustainable land/agriculture practice) E12 (Companies without sustainable oceans/seas practice) E15 (Deforestation)	High risk for human rights or conflict minerals without relevant policy and practices; Significant controversies
	Social	Human rights & community	S9 (Lack of human rights policy) S10 (Lack of human rights due diligence)
Labour practices		S1 (Companies without workplace accident prevention policies) S2 (Rate of accidents) S3 (Numbers of days lost to injuries, accidents, fatalities or illness) S4 (Lack of supplier code of conduct) 12 (Unadjusted gender pay gap) S5 (Lack of grievance/complaints mechanism for employee matters) S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights without relevant policies, targets and monitoring; Significant controversies
Supply chain management		S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights in the supply chain without relevant policies, targets and monitoring; Significant controversies
Governance		Corporate governance	13 (Board gender diversity) S8 (Excessive CEO pay ratio)
	Business ethics	S15 (Lack of anti-corruption and anti-bribery policies) S6 (Insufficient whistleblower protection)	Significant controversies

For instruments issued by sovereigns (e.g. impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact), both as part of the initial screening and the continuous monitoring of investments:

Triodos ESG issue	SFDR PAI	Threshold
Environmental	15 (GHG intensity)	Ratification of: <ul style="list-style-type: none">• Paris Convention• Framework Convention on Climate Change• Kyoto Protocol
Governance	16 (Investee countries subject to social violations)	<ul style="list-style-type: none">• Ratification of international controversial weapons conventions• United Nations and European Union sanctions

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

All investments made in 2022 were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Prior to being selected for investment and for the entire duration of the investment, (potential) investees are screened for compliance with the Minimum Standards. The Minimum Standards are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Alignment with the Minimum Standards is assessed in the second phase of the investment process through the check on controversies and the ESG assessment, based on data from external sources and additional in-house desk research (see above the answer to question 'How were the indicators for adverse impacts on sustainability factors taken into account?'). In case of significant violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (i.e. having severe impact, recurrence of incidents, lack of risk management and inadequate remediation measures), the investee is excluded from investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered all PAIs on sustainability factors referred to in the tables above. Every potential investment has been assessed using the relevant policies and if an issuer was found to cause significant harm, it was excluded from investment. PAIs have been continuously monitored to ensure the sub-fund remained compliant with our policies.

In 2022, continuous monitoring led to one company (Adecco) being excluded from the Triodos SICAV I investable universe due to an acquisition with involvement in weapons (relating to PAI indicator: Exposure to controversial weapons).

The engagement efforts with investee companies aimed at minimising principal adverse impacts were focused on the PAI indicators related to greenhouse gas emissions, companies producing chemicals and excessive CEO pay ratio.

The list includes the investments constituting the greatest proportion of investments of the financial during the reference period which is: 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
EssilorLuxottica	Manufacture of medical and dental instruments and supplies	1.8	France

Source (Sector): NACE5

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.2% of the net assets of the sub-fund were invested in sustainable investments as per 31 December 2022.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

In which economic sectors were the investments made?

Several new investments were done over the year 2022. The investments have been done across sectors related to:

- Manufacture of builders' ware of plastic
- Rental and operating of own or leased real estate
- Other software publishing
- Manufacture of electronic components
- Manufacture of other chemical products
- Monetary intermediation
- Publishing of books, periodicals and other publishing activities
- Transmission of electricity
- Manufacture of sports goods
- Trusts, funds and similar financial entities
- Other financial service activities, except insurance and pension funding
- Manufacture of medical and dental instruments and supplies
- General public administration activities
- Water collection, treatment and supply
- Passenger rail transport, interurban
- Other financial service activities, except insurance and pension funding n.e.c.
- Data processing, hosting and related activities
- Production of electricity
- Manufacture of other parts and accessories for motor vehicles
- Retail sale via mail order houses or via Internet
- Manufacture of household and sanitary goods and of toilet requisites

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributes to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation (4.6%)
- climate change adaptation (0%)

As per 31 December 2022, 4.6% of the investments were Taxonomy aligned. The sub-fund had exposure to impact bonds issued by (sub-)sovereigns.

The Taxonomy percentages shown in the graphs below have not been subject to an assurance by an auditor or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2022, the sub-fund invested 1.5% of its investments in enabling activities and 1.1% in transitional activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As the reporting on Taxonomy alignment is only in place since this year, a comparison with the Taxonomy alignment figures of the previous reporting period will only be available in the annual report over 2023.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 84.0% as at 31 December 2022.

We do not steer on the percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Triodos transition themes, which are used for the positive selection of the investments, encompass more environmentally sustainable economic activities than currently covered by the EU Taxonomy. Presently, the EU Taxonomy focusses on certain sectors only, whereas the Triodos transition themes are sector-agnostic. The percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is likely to decrease over time as the remaining four Taxonomy objectives are finalised and more economic activities are added to the Taxonomy.

What was the share of socially sustainable investments?

The share of sustainable investments contributing to a social objective was 53.5% as at 31 December 2022.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund held 0.8% of its net assets in cash and cash equivalents as ancillary liquidity and in derivatives for hedging purposes (for those share classes that are allowed to hold currency derivatives as hedging instruments). These assets did not affect the delivery of the sustainable investment objectives of the sub-fund on a continuous basis. Firstly, they were used - in limited proportion - to support the proper liquidity and risk management of the sub-fund. Secondly, the Management Company assessed on a regular basis whether counterparties for cash, cash equivalents and derivatives comply with the four pillars of the UN Global Compact, using data from a third-party provider. These four pillars consist of 1) human rights, 2) labour rights 3) environment and 4) anti-corruption. Also, the Management Company assessed its counterparties' policies and sustainability performance.

What actions have been taken to attain the sustainable investment objective during the reference period?

Triodos Impact Mixed Fund – Neutral improved its positive impact profile further in 2022. We exchanged a series of smaller and low conviction equity holdings for high impact positions; KLA (semiconductor equipment), Akamai (internet hardware and services), Shimano (bicycle parts), Nvidia (processors and software), DSM (ingredients), EssilorLuxottica (eyewear), Sonova (hearing equipment), Adyen (on-line payments), Mastercard (payment systems) and Ebay (trading platform).

Also, in fixed income we improved the impact of the fund. New additions included RTE (French electricity grid), Royal DSM (ingredients), Aedifica (housing), Kuntarahoitus (Finland) impact bond, Coloplast (medical equipment), ALD green bond (leasing fleet), Essilor (eyewear), Cades (French social institution), Suez (environmental services), Ferrovie dello State Italiane (Italian railways), ICO (Spanish social institution), EU social bonds, Madrid green bond, Statkraft (renewable energy), Continental (energy efficiency) and green bonds issued by the governments of France, Austria and Germany.

A major improvement in terms of impact is the fact that we have exchanged all regular government bonds for impact government(-related) issues. At year-end all fixed income investments of Triodos Impact Mixed Fund - Neutral were thematic and in line with a least one of the seven Triodos sustainable transition themes.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Product name: Triodos Impact Mixed Fund - Offensive
Legal entity identifier: 549300F21J6UWEJ11S34

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: <u>42.2%</u>	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: <u>56.7%</u>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the sub-fund are to:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

The (environmental) objective to contribute to the transition to an economy within planetary boundaries is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Sustainable Mobility and Infrastructure (be mobile, live and work in a sustainable way)
- Renewable Resources (limit the use of finite resources)
- Circular Economy (make use of resources as efficiently and long as possible)
- Innovation for Sustainability (innovate for a sustainable future)

The (social) objective to contribute to the transition to an economy where all humans can enjoy a prosperous life is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Prosperous and Healthy People (become and stay healthy and happy)
- Social Inclusion and Empowerment (create a society in which all people can fully participate)
- Innovation for Sustainability (innovate for a sustainable future)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation
- climate change adaptation

The sub-fund realised its three sustainable investment objectives by investing solely in listed equities that actively contribute to at least one transition theme.

How did the sustainability indicators perform?

In order to measure the attainment of its sustainable investment objectives, the sub-fund measures its exposure to the Triodos transition themes as a percentage of portfolio holdings that contribute to at least one transition theme and as a percentage of assets under management allocated to each theme. Since each Triodos transition theme is linked to one or more UN Sustainable Development Goals (SDGs), the sub-fund also reports its absolute and relative contribution to environmental (SDGs 6, 7, 11, 12, 13 and 15) or social (SDGs 1, 2, 3, 4, 5, 10 and 16) SDGs based on external data performing a comprehensive assessment of company products and services that affect SDGs. The contribution is measured by SDG scores, which range on a scale from -10 (products/services having a significant obstructing impact to the SDGs) to 10 (products/services having a significant contributing impact to the SDGs). The sub-fund also reports its carbon footprint relative to its benchmark (scope 1 and 2 emissions). The benchmark of the sub-fund (used for performance measurement only) is MSCI World Index (75%), iBoxx Euro Corporates Overall Total Return (15%) and iBoxx Euro Eurozone Sovereign 1-10 Total Return (10%).

In 2022, all investments contributed to at least one of the transition themes. All seven transition themes were represented in the sub-fund with the largest exposure at year-end to Prosperous and Healthy People (25.5% of NAV).

The contribution of the sub-fund to the SDGs was significantly higher than that of the benchmark. The sub-fund particularly contributed to SDG3, SDG7 and SDG13.

	Sub-fund	Benchmark
Environmental SDGs	1.8	-0.2
Social SDGs	3.1	0.9

Source: ISS SDG Product & Services Score as of 31 December 2022

The carbon footprint of the sub-fund was lower than that of the benchmark:

	Sub-fund	Benchmark
Carbon footprint (tonnes of CO ₂ equivalent)	1,575	3,877

Source: ISS as of 31 December 2022

The performance of the indicators is a consequence of the investment strategy of the sub-funds and not a result of targeting specific indicator results. The data used to calculate the performance of the sustainability indicators is derived by the Management Company from companies directly and/or via data providers and have not been subject to an assurance by an auditor or a review by a third party.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

...and compared to previous periods?

Compared to 2021, the contribution of the sub-fund to the transition themes has changed as follows:

	31 December 2022	31 December 2021
Social Inclusion and Empowerment	18.4%	15.8%
Prosperous and Healthy People	25.5%	23.9%
Sustainable Food and Agriculture	6.6%	6.3%
Renewable Resources	7.8%	6.2%
Circular Economy	3.2%	2.8%
Innovation for Sustainability	17.3%	15.6%
Sustainable Mobility and Infrastructure	20.2%	18.9%
Cash	1.1%	6.0%
Regular (sub-)sovereign bonds	–	4.7%

The contribution of the sub-fund to the SDGs as at 31 December 2022 was higher than as at 31 December 2021:

	31 December 2022	31 December 2021
Environmental SDGs	1.8	1.7
Social SDGs	3.1	3.0

The relative carbon footprint of the sub-fund was lower as at 31 December 2022 than as at 31 December 2021:

	31 December 2022	31 December 2021
Carbon footprint (tonnes of CO ₂ equivalent)	-59.4%	-15.5%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To select only those investments that do not cause significant harm to any environmental or social sustainable investment objective, every (new) investment has been assessed on its alignment with the Minimum Standards or the Sovereign Framework (depending on the type of instrument). If an issuer was found to cause significant harm to any of those standards, it was excluded from investment. All applicable PAIs on sustainability factors have been taken into account in the investment process. The Minimum Standards, that are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, also set out the minimum standards for employee relations, remuneration, taxes and other corporate governance topics that investees must meet in order to be eligible for investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

With the introduction of the SFDR Delegated Regulation as from 1 January 2023, PAIs have been introduced to establish standards for reporting on principal adverse impacts. The process for taking into account PAIs as applied from 1 January 2023 is detailed below. In 2022, all investments of the sub-fund were screened against the Minimum Standards or the Sovereign Framework to avoid or reduce principal adverse impacts when investing.

For instruments issued by companies (e.g. shares, corporate bonds, impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact, consisting of three steps), both as part of the initial screening and the continuous monitoring of investments:

1. Negative screening: Every (potential) investee has been screened for involvement in controversial business activities. If an investee exceeded the threshold below, “high concern” was concluded, and the investee was excluded from investment.

Triodos controversial activity	SFDR PAI	Threshold
Controversial weapons	14 (Exposure to controversial weapons)	Any involvement
Fossil fuels	4 (Exposure to companies active in the fossil fuel sector)	GICS Energy Sector classification (i.e. companies active in the fossil fuel sector)
Hazardous substances	E9 (Investments in companies producing chemicals)	Pesticides – production, distribution (>5% revenue) Persistent Organic Pollutants – production, use (>0% revenue)

2. Controversies: Every (potential) investee has been assessed on violations of UN Global Compact and OECD Guidelines for Multinational Enterprises on a case-by-case basis considering violations in the last three years. Per case, the verification of information, severity and company response were considered to conclude if a case was low, medium or high concern. In case a company had been involved in severe and/or frequent violations without taking credible remediation measures, “high concern” was concluded, and the investee was excluded from investment.

Triodos assessment	SFDR PAI	Threshold
Controversies	10 (Violations of UN Global Compact principles and OECD Guidelines) 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines) S7 (Incidents of discrimination) S14 (Number of severe human rights issues and incidents) S16 (Cases of insufficient action with breaches of anti-corruption) S17 (Convictions and fines for anti-corruption)	Significant violations of UN Global Compact or OECD Guidelines within the last 3 years

3. ESG assessment: By combining our proprietary materiality map, highlighting material ESG issues per industry, with an understanding of the company’s actual business activities, the risk that an investee inflicts negative impacts on these ESG issues has been assessed. Based on the risk classification (low, medium or high risk), the company must have met additional requirements such as having sustainability programs, reporting, certifications, policies or practices in place. In case a company did not meet these requirements but was in transition, it was flagged for engagement. The PAI indicators were considered on an absolute basis, over time and compared to five peers (where relevant). Taking all of the above into consideration, a company’s practices were assessed as low, medium or high concern. If “high concern” was concluded, the investee was excluded from investment.

Triodos			
ESG issue		SFDR PAI	Threshold
Environmental	Climate change	1 (GHG emissions) 2 (Carbon footprint) 3 (GHG intensity) 5 (Share of non-renewable energy consumption and production) 6 (Energy consumption intensity) E4 (Companies without carbon reduction initiatives) E5 (Energy consumption per non-renewable energy source)	High risk for climate change without GHG emissions reporting and Paris-aligned reduction targets; Significant controversies
	Water	E6 (Water usage and recycling) E7 (Investments in companies with-out water management policies) E8 (Exposure to areas of high water stress)	High risk for water scarcity without activities to reduce freshwater use; Significant controversies
	Waste	E13 (Non-recycled waste ratio)	Significant controversies
	Pollution	8 (Emissions to water) 9 (Hazardous and radioactive waste ratio) E2 (Emissions of air pollutants)	Significant controversies
	Ecosystems	7 (Activities negatively affecting biodiversity) E11 (Companies without sustainable land/agriculture practice) E12 (Companies without sustainable oceans/seas practice) E15 (Deforestation)	High risk for human rights or conflict minerals without relevant policy and practices; Significant controversies
	Social	Human rights & community	S9 (Lack of human rights policy) S10 (Lack of human rights due diligence)
Labour practices		S1 (Companies without workplace accident prevention policies) S2 (Rate of accidents) S3 (Numbers of days lost to injuries, accidents, fatalities or illness) S4 (Lack of supplier code of conduct) 12 (Unadjusted gender pay gap) S5 (Lack of grievance/complaints mechanism for employee matters) S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights without relevant policies, targets and monitoring; Significant controversies
Supply chain management		S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights in the supply chain without relevant policies, targets and monitoring; Significant controversies
Governance		Corporate governance	13 (Board gender diversity) S8 (Excessive CEO pay ratio)
	Business ethics	S15 (Lack of anti-corruption and anti-bribery policies) S6 (Insufficient whistleblower protection)	Significant controversies

For instruments issued by sovereigns (e.g. impact bonds):

The PAIs have been taken into account in the second phase of the investment process (negative impact), both as part of the initial screening and the continuous monitoring of investments:

Triodos ESG issue	SFDR PAI	Threshold
Environmental	15 (GHG intensity)	Ratification of: <ul style="list-style-type: none">• Paris Convention• Framework Convention on Climate Change• Kyoto Protocol
Governance	16 (Investee countries subject to social violations)	<ul style="list-style-type: none">• Ratification of international controversial weapons conventions• United Nations and European Union sanctions

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

All investments made in 2022 were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Prior to being selected for investment and for the entire duration of the investment, (potential) investees are screened for compliance with the Minimum Standards. The Minimum Standards are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Alignment with the Minimum Standards is assessed in the second phase of the investment process through the check on controversies and the ESG assessment, based on data from external sources and additional in-house desk research (see above the answer to question 'How were the indicators for adverse impacts on sustainability factors taken into account?'). In case of significant violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (i.e. having severe impact, recurrence of incidents, lack of risk management and inadequate remediation measures), the investee is excluded from investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered all PAIs on sustainability factors referred to in the tables above. Every potential investment has been assessed using the relevant policies and if an issuer was found to cause significant harm, it was excluded from investment. PAIs have been continuously monitored to ensure the sub-fund remained compliant with our policies.

In 2022, continuous monitoring led to one company (Adecco) being excluded from the Triodos SICAV I investable universe due to an acquisition with involvement in weapons (relating to PAI indicator: Exposure to controversial weapons).

The engagement efforts with investee companies aimed at minimising principal adverse impacts were focused on the PAI indicators related to greenhouse gas emissions, companies producing chemicals and excessive CEO pay ratio.

The list includes the investments constituting the greatest proportion of investments of the financial during the reference period which is: 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
EssilorLuxottica	Manufacture of medical and dental instruments and supplies	2.8	France
Vestas Wind Systems	Manufacture of engines and turbines, except aircraft, vehicle and cycle engines	2.6	Denmark

Source (Sector): NACE5

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.9% of the net assets of the sub-fund were invested in sustainable investments as per 31 December 2022.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

In which economic sectors were the investments made?

Several new investments were done over the year 2022. The investments have been done across sectors related to:

- Manufacture of builders' ware of plastic
- Rental and operating of own or leased real estate
- Other software publishing
- Manufacture of other pumps and compressors
- Manufacture of electronic components
- Manufacture of other chemical products
- Monetary intermediation
- Publishing of books, periodicals and other publishing activities
- Transmission of electricity
- Manufacture of sports goods
- Other financial service activities, except insurance and pension funding
- Manufacture of medical and dental instruments and supplies
- General public administration activities
- Water collection, treatment and supply
- Passenger rail transport, interurban
- Other financial service activities, except insurance and pension funding n.e.c.
- Data processing, hosting and related activities
- Production of electricity
- Manufacture of other parts and accessories for motor vehicles
- Retail sale via mail order houses or via Internet
- Manufacture of household and sanitary goods and of toilet requisites

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributes to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation (6.7%)
- climate change adaptation (0%)

As per 31 December 2022, 6.7% of the investments were Taxonomy aligned. The sub-fund had exposure to impact bonds issued by (sub-)sovereigns.

The Taxonomy percentages shown in the graphs below have not been subject to an assurance by an auditor or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas
- In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2022, the sub-fund invested 2.3% of its investments in enabling activities and 1.4% in transitional activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As the reporting on Taxonomy alignment is only in place since this year, a comparison with the Taxonomy alignment figures of the previous reporting period will only be available in the annual report over 2023.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 65.7% as at 31 December 2022.

We do not steer on the percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Triodos transition themes, which are used for the positive selection of the investments, encompass more environmentally sustainable economic activities than currently covered by the EU Taxonomy. Presently, the EU Taxonomy focusses on certain sectors only, whereas the Triodos transition themes are sector-agnostic. The percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is likely to decrease over time as the remaining four Taxonomy objectives are finalised and more economic activities are added to the Taxonomy.

What was the share of socially sustainable investments?

The share of sustainable investments contributing to a social objective was 56.7% as at 31 December 2022.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund held 1.1% of its net assets in cash and cash equivalents as ancillary liquidity. Cash and cash equivalents did not affect the delivery of the sustainable investment objectives of the sub-fund on a continuous basis. Firstly, they were used - in limited proportion - to support the proper liquidity management of the sub-fund. Secondly, the Management Company assessed on a regular basis whether counterparties for cash and cash equivalents comply with the four pillars of the UN Global Compact, using data from a third-party provider. These four pillars consist of 1) human rights, 2) labour rights 3) environment and 4) anti-corruption. Also, the Management Company assessed its counterparties' policies and sustainability performance.

What actions have been taken to attain the sustainable investment objective during the reference period?

Triodos Impact Mixed Fund – Offensive improved its positive impact profile further in 2022. We exchanged a series of smaller and low conviction equity holdings for high impact positions; KLA (semiconductor equipment), Akamai (internet hardware and services), Shimano (bicycle parts), Nvidia (processors and software), DSM (ingredients), EssilorLuxottica (eyewear), Sonova (hearing equipment), Adyen (on-line payments), Mastercard (payment systems) and Ebay (trading platform).

Also, in fixed income we improved the impact of the fund. New additions included RTE (French electricity grid), Royal DSM (ingredients), Aedifica (housing), Kuntarahoitus (Finland) impact bond, Coloplast (medical equipment), ALD green bond (leasing fleet), Essilor (eyewear), Cades (French social institution), Suez (environmental services), Ferrovie dello State Italiane (Italian railways), ICO (Spanish social institution), EU social bonds, Madrid green bond, Statkraft (renewable energy), Continental (energy efficiency) and green bonds issued by the governments of France, Austria and Germany.

A major improvement in terms of impact is the fact that we have exchanged all regular government bonds for impact government(-related) issues. At year-end all fixed income investments of Triodos Impact Mixed Fund - Offensive were thematic and in line with a least one of the seven Triodos sustainable transition themes.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Product name: Triodos Pioneer Impact Fund
Legal entity identifier: 549300K3BHI3TTMCAP19

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: <u>76.9%</u>	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: <u>21.1%</u>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the sub-fund are to:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

The (environmental) objective to contribute to the transition to an economy within planetary boundaries is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Sustainable Mobility and Infrastructure (be mobile, live and work in a sustainable way)
- Renewable Resources (limit the use of finite resources)
- Circular Economy (make use of resources as efficiently and long as possible)
- Innovation for Sustainability (innovate for a sustainable future)

The (social) objective to contribute to the transition to an economy where all humans can enjoy a prosperous life is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Prosperous and Healthy People (become and stay healthy and happy)
- Social Inclusion and Empowerment (create a society in which all people can fully participate)
- Innovation for Sustainability (innovate for a sustainable future)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation
- climate change adaptation

The sub-fund realised its three sustainable investment objectives by investing solely in listed equities that actively contribute to at least one transition theme.

How did the sustainability indicators perform?

In order to measure the attainment of its sustainable investment objectives, the sub-fund measures its exposure to the Triodos transition themes as a percentage of portfolio holdings that contribute to at least one transition theme and as a percentage of assets under management allocated to each theme. Since each Triodos transition theme is linked to one or more UN Sustainable Development Goals (SDGs), the sub-fund also reports its absolute and relative contribution to environmental (SDGs 6, 7, 11, 12, 13 and 15) or social (SDGs 1, 2, 3, 4, 5, 10 and 16) SDGs based on external data performing a comprehensive assessment of company products and services that affect SDGs. The contribution is measured by SDG scores, which range on a scale from -10 (products/services having a significant obstructing impact to the SDGs) to 10 (products/services having a significant contributing impact to the SDGs). The sub-fund also reports its carbon footprint relative to its benchmark (scope 1 and 2 emissions). The benchmark of the sub-fund (used for performance measurement only) is MSCI World Small & Mid Cap Index.

In 2022, all investments contributed to at least one of the transition themes. All seven transition themes were represented in the sub-fund with the largest exposure at year-end to Innovation for Sustainability (23.6% of NAV).

The contribution of the sub-fund to the SDGs was significantly higher than that of the benchmark. The sub-fund particularly contributed to SDG3, SDG7 and SDG13.

	Sub-fund	Benchmark
Environmental SDGs	4.8	-0.2
Social SDGs	1.2	0.8

Source: ISS SDG Product & Services Score as of 31 December 2022

The carbon footprint of the sub-fund was lower than that of the benchmark:

	Sub-fund	Benchmark
Carbon footprint (tonnes of CO ₂ equivalent)	41,185	115,375

Source: ISS as of 31 December 2022

The performance of the indicators is a consequence of the investment strategy of the sub-funds and not a result of targeting specific indicator results. The data used to calculate the performance of the sustainability indicators is derived by the Management Company from companies directly and/or via data providers and have not been subject to an assurance by an auditor or a review by a third party.

...and compared to previous periods?

Compared to 2021, the contribution of the sub-fund to the transition themes has changed as follows:

	31 December 2022	31 December 2021
Social Inclusion and Empowerment	10.9%	8.5%
Prosperous and Healthy People	10.5%	16.8%
Sustainable Food and Agriculture	8.4%	9.5%
Renewable Resources	23.5%	22.0%
Circular Economy	7.9%	7.4%
Innovation for Sustainability	23.6%	19.6%
Sustainable Mobility and Infrastructure	13.2%	11.4%
Cash	1.9%	4.9%

The contribution of the sub-fund to the environmental SDGs as at 31 December 2022 was higher than as at 31 December 2021:

	31 December 2022	31 December 2021
Environmental SDGs	4.8	4.2
Social SDGs	1.2	2.0

The relative carbon footprint of the sub-fund was lower as at 31 December 2022 than as at 31 December 2021:

	31 December 2022	31 December 2021
Carbon footprint (tonnes of CO ₂ equivalent)	-64.3%	-75.4%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To select only those investments that do not cause significant harm to any environmental or social sustainable investment objective, every (new) investment has been assessed on its alignment with the Minimum Standards. If an issuer was found to cause significant harm to any of those standards, it was excluded from investment. All applicable PAIs on sustainability factors have been taken into account in the investment process. The Minimum Standards, that are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, also set out the minimum standards for employee relations, remuneration, taxes and other corporate governance topics that investees must meet in order to be eligible for investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

With the introduction of the SFDR Delegated Regulation as from 1 January 2023, PAIs have been introduced to establish standards for reporting on principal adverse impacts. The process for taking into account PAIs as applied from 1 January 2023 is detailed below. In 2022, all investments of the sub-fund were screened against the Minimum Standards to avoid or reduce principal adverse impacts when investing.

The PAIs have been taken into account in the second phase of the investment process (negative impact, consisting of three steps), both as part of the initial screening and the continuous monitoring of investments:

1. Negative screening: Every (potential) investee has been screened for involvement in controversial business activities. If an investee exceeded the threshold below, “high concern” was concluded, and the investee was excluded from investment.

Triodos controversial activity	SFDR PAI	Threshold
Controversial weapons	14 (Exposure to controversial weapons)	Any involvement
Fossil fuels	4 (Exposure to companies active in the fossil fuel sector)	GICS Energy Sector classification (i.e. companies active in the fossil fuel sector)
Hazardous substances	E9 (Investments in companies producing chemicals)	Pesticides – production, distribution (>5% revenue) Persistent Organic Pollutants – production, use (>0% revenue)

2. Controversies: Every (potential) investee has been assessed on violations of UN Global Compact and OECD Guidelines for Multinational Enterprises on a case-by-case basis considering violations in the last three years. Per case, the verification of information, severity and company response were considered to conclude if a case was low, medium or high concern. In case a company had been involved in severe and/or frequent violations without taking credible remediation measures, “high concern” was concluded, and the investee was excluded from investment.

Triodos assessment	SFDR PAI	Threshold
Controversies	10 (Violations of UN Global Compact principles and OECD Guidelines) 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines) S7 (Incidents of discrimination) S14 (Number of severe human rights issues and incidents) S16 (Cases of insufficient action with breaches of anti-corruption) S17 (Convictions and fines for anti-corruption)	Significant violations of UN Global Compact or OECD Guidelines within the last 3 years

3. ESG assessment: By combining our proprietary materiality map, highlighting material ESG issues per industry, with an understanding of the company’s actual business activities, the risk that an investee inflicts negative impacts on these ESG issues has been assessed. Based on the risk classification (low, medium or high risk), the company must have met additional requirements such as having sustainability programs, reporting, certifications, policies or practices in place. In case a company did not meet these requirements but was in transition, it was flagged for engagement. The PAI indicators were considered on an absolute basis, over time and compared to five peers (where relevant). Taking all of the above into consideration, a company’s practices were assessed as low, medium or high concern. If “high concern” was concluded, the investee was excluded from investment.

Triodos			
ESG issue		SFDR PAI	Threshold
Environmental	Climate change	1 (GHG emissions) 2 (Carbon footprint) 3 (GHG intensity) 5 (Share of non-renewable energy consumption and production) 6 (Energy consumption intensity) E4 (Companies without carbon reduction initiatives) E5 (Energy consumption per non-renewable energy source)	High risk for climate change without GHG emissions reporting and Paris-aligned reduction targets; Significant controversies
	Water	E6 (Water usage and recycling) E7 (Investments in companies with-out water management policies) E8 (Exposure to areas of high water stress)	High risk for water scarcity without activities to reduce freshwater use; Significant controversies
	Waste	E13 (Non-recycled waste ratio)	Significant controversies
	Pollution	8 (Emissions to water) 9 (Hazardous and radioactive waste ratio) E2 (Emissions of air pollutants)	Significant controversies
	Ecosystems	7 (Activities negatively affecting biodiversity) E11 (Companies without sustainable land/agriculture practice) E12 (Companies without sustainable oceans/seas practice) E15 (Deforestation)	High risk for human rights or conflict minerals without relevant policy and practices; Significant controversies
	Social	Human rights & community	S9 (Lack of human rights policy) S10 (Lack of human rights due diligence)
Labour practices		S1 (Companies without workplace accident prevention policies) S2 (Rate of accidents) S3 (Numbers of days lost to injuries, accidents, fatalities or illness) S4 (Lack of supplier code of conduct) 12 (Unadjusted gender pay gap) S5 (Lack of grievance/complaints mechanism for employee matters) S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights without relevant policies, targets and monitoring; Significant controversies
Supply chain management		S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights in the supply chain without relevant policies, targets and monitoring; Significant controversies
Governance		Corporate governance	13 (Board gender diversity) S8 (Excessive CEO pay ratio)
	Business ethics	S15 (Lack of anti-corruption and anti-bribery policies) S6 (Insufficient whistleblower protection)	Significant controversies

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

All investments made in 2022 were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Prior to being selected for investment and for the entire duration of the investment, (potential) investees are screened for compliance with the Minimum Standards. The Minimum Standards are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Alignment with the Minimum Standards is assessed in the second phase of the investment process through the check on controversies and the ESG assessment, based on data from external sources and additional in-house desk research (see above the answer to question 'How were the indicators for adverse impacts on sustainability factors taken into account?'). In case of significant violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (i.e. having severe impact, recurrence of incidents, lack of risk management and inadequate remediation measures), the investee is excluded from investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered all PAIs on sustainability factors referred to in the tables above. Every potential investment has been assessed using the relevant policies and if an issuer was found to cause significant harm, it was excluded from investment. PAIs have been continuously monitored to ensure the sub-fund remained compliant with our policies.

In 2022, continuous monitoring led to one company (Adecco) being excluded from the Triodos SICAV I investable universe due to an acquisition with involvement in weapons (relating to PAI indicator: Exposure to controversial weapons).

The engagement efforts with investee companies aimed at minimising principal adverse impacts were focused on the PAI indicators related to greenhouse gas emissions, companies producing chemicals and excessive CEO pay ratio.

The list includes the investments constituting the greatest proportion of investments of the financial during the reference period which is: 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
First Solar	Manufacture of electric motors, generators, transformers and electricity distribution and control apparatus	3.7	United States
Acciona Energías Renovables	Production of electricity	3.6	Spain
Kyoritsu Maintenance	Hotels and similar accommodation	3.5	Japan
Strategic Education	Higher education	3.5	United States
D S Smith	Manufacture of other articles of paper and paperboard	3.4	Great Britain
Bakkafrost	Fishing	3.3	Faroe Islands
Power Integrations	Manufacture of electronic components	3.2	United States
Terna	Transmission of electricity	3.1	Italy
Signify	Manufacture of electric lighting equipment	3.1	Netherlands
Kurita Water Industries	Installation of industrial machinery and equipment	3.0	Japan
Universal Display	Manufacture of electronic components	3.0	United States
Badger Meter	Manufacture of instruments and appliances for measuring, testing and navigation	2.9	United States
Christian Hansen	Manufacture of chemicals and chemical products	2.9	Denmark
BE Semiconductor Industries	Manufacture of other special-purpose machinery	2.8	Netherlands
Advanced Drainage Systems	Manufacture of builders' ware of plastic	2.8	United States

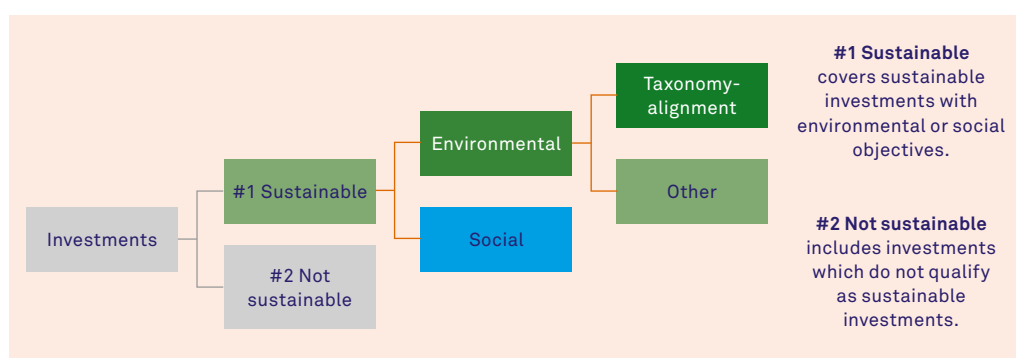

Source (Sector): NACE5

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.1% of the net assets of the sub-fund were invested in sustainable investments as per 31 December 2022.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

In which economic sectors were the investments made?

Several new investments were done over the year 2022. The investments have been done across sectors related to:

- Temporary employment agency activities
- Transmission of electricity
- Trusts, funds and similar financial entities

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributes to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation (13.6%)
- climate change adaptation (0%)

As per 31 December 2022, 13.6% of the investments were Taxonomy aligned. The sub-fund did not have any sovereign exposures.

The Taxonomy percentages shown in the graphs below have not been subject to an assurance by an auditor or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas
 - In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2022, the sub-fund invested 9.5% of its investments in enabling activities and 1.7% in transitional activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As the reporting on Taxonomy alignment is only in place since this year, a comparison with the Taxonomy alignment figures of the previous reporting period will only be available in the annual report over 2023.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 82.3% as at 31 December 2022.

We do not steer on the percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Triodos transition themes, which are used for the positive selection of the investments, encompass more environmentally sustainable economic activities than currently covered by the EU Taxonomy. Presently, the EU Taxonomy focusses on certain sectors only, whereas the Triodos transition themes are sector-agnostic. The percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is likely to decrease over time as the remaining four Taxonomy objectives are finalised and more economic activities are added to the Taxonomy.

What was the share of socially sustainable investments?

The share of sustainable investments contributing to a social objective was 21.1% as at 31 December 2022.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund held 1.9% of its net assets in cash and cash equivalents as ancillary liquidity. Cash and cash equivalents did not affect the delivery of the sustainable investment objectives of the sub-fund on a continuous basis. Firstly, they were used - in limited proportion - to support the proper liquidity management of the sub-fund. Secondly, the Management Company assessed on a regular basis whether counterparties for cash and cash equivalents comply with the four pillars of the UN Global Compact, using data from a third-party provider. These four pillars consist of 1) human rights, 2) labour rights 3) environment and 4) anti-corruption. Also, the Management Company assessed its counterparties' policies and sustainability performance.

What actions have been taken to attain the sustainable investment objective during the reference period?

In our investment philosophy we strive for a balanced approach in diversifying the portfolio holdings over the environmental and social side of the impact spectrum. A new holding added in 2022 in our Sustainable Mobility & Infrastructure theme (environmental side) was Italian electricity transmission company Terna. Terna plays a pivotal role in enabling the energy transition, by strengthening and adapting its grids for more generation of renewable energy.

Another holding added in Social Inclusion & Empowerment theme (social side) was S-Pool. This is a Japanese company that provides outsourcing services including providing temporary staffing. It focuses on serving demographic groups for which it is challenging to find employment opportunities such as young people, housewives, single mothers, seniors, and people with physical, intellectual, or mental disabilities.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Product name: Triodos Future Generations Fund
Legal entity identifier: 549300472HRRQV1LXG31

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 29.1% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 66.4%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objectives of the sub-fund are to:

- finance solutions that enhance child prosperity
- promote a safe and clean environment for children
- contribute to the transition to an economy where all children can enjoy a prosperous life

In order to realise these three objectives, the sub-fund invests in listed equities that actively contribute to at least one Triodos transition theme .

The (environmental) objective to contribute to the transition to an economy within planetary boundaries is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Sustainable Mobility and Infrastructure (be mobile, live and work in a sustainable way)
- Renewable Resources (limit the use of finite resources)
- Circular Economy (make use of resources as efficiently and long as possible)
- Innovation for Sustainability (innovate for a sustainable future)

The (social) objective to contribute to the transition to an economy where all humans can enjoy a prosperous life is addressed in the following Triodos transition themes:

- Sustainable Food and Agriculture (feed the world sustainably)
- Prosperous and Healthy People (become and stay healthy and happy)
- Social Inclusion and Empowerment (create a society in which all people can fully participate)
- Innovation for Sustainability (innovate for a sustainable future)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Specifically, the fund invests in listed equities that actively contribute to at least one child prosperity-enabling focus area, within the Triodos transition themes. These are:

- Child health and survival
- Access to education
- Protection from violence and exploitation
- Environment and climate
- Equality and inclusion

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributed to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation
- climate change adaptation

The sub-fund realised its three sustainable investment objectives by investing solely in listed equities that actively contribute to at least one transition theme. Furthermore, the sub-fund had investments in all child-prosperity enabling focus areas.

How did the sustainability indicators perform?

In order to measure the attainment of its sustainable investment objectives, the sub-fund measures its exposure to the child prosperity-enabling focus areas as a percentage of investments made in these focus areas. Since each Triodos transition theme is linked to one or more UN Sustainable Development Goals (SDGs), the sub-fund also reports its absolute and relative contribution to environmental (SDGs 6, 7, 11, 12, 13 and 15) or social (SDGs 1, 2, 3, 4, 5, 10 and 16) SDGs based on external data performing a comprehensive assessment of company products and services that affect SDGs. The contribution is measured by SDG scores, which range on a scale from -10 (products/services having a significant obstructing impact to the SDGs) to 10 (products/services having a significant contributing impact to the SDGs). The sub-fund also reports its carbon footprint relative to its benchmark (scope 1 and 2 emissions), as well as the number of engagements per child prosperity-enabling focus area. The benchmark of the sub-fund (used for performance measurement only) is MSCI World Impact ESG Select Children's Rights Index.

In 2022, all investments contributed to at least one of the transition themes and at least one child prosperity-enabling focus area. All five child prosperity-enabling focus areas were represented in the sub-fund with the largest exposure at year-end to Child health and survival (39.1% of NAV).

The contribution of the sub-fund to the SDGs was significantly higher than that of the benchmark. The sub-fund particularly contributed to SDG3, SDG4 and SDG10.

	Sub-fund	Benchmark
Environmental SDGs	2.2	-0.1
Social SDGs	4.2	1.7

Source: ISS SDG Product & Services Score as of 31 December 2022

The carbon footprint of the sub-fund was lower than that of the benchmark:

	Sub-fund	Benchmark
Carbon footprint (tonnes of CO ₂ equivalent)	1,129	7,234

Source: ISS as of 31 December 2022

As the sub-fund was launched 31 March 2022, preparations for the engagements per child prosperity-enabling focus area were still ongoing. Data on the number of engagements per focus area will be available in future periodic reports.

The performance of the indicators is a consequence of the investment strategy of the sub-funds and not a result of targeting specific indicator results. The data used to calculate the performance of the sustainability indicators is derived by the Management Company from companies directly and/or via data providers and have not been subject to an assurance by an auditor or a review by a third party.

...and compared to previous periods?

As the sub-fund was launched 31 March 2022, there are no comparative figures available for 31 December 2022.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

To select only those investments that do not cause significant harm to any environmental or social sustainable investment objective, every (new) investment has been assessed on its alignment with the Minimum Standards. If an issuer was found to cause significant harm to any of those standards, it was excluded from investment. All applicable PAIs on sustainability factors have been taken into account in the investment process. The Minimum Standards, that are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, also set out the minimum standards for employee relations, remuneration, taxes and other corporate governance topics that investees must meet in order to be eligible for investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

With the introduction of the SFDR Delegated Regulation as from 1 January 2023, PAIs have been introduced to establish standards for reporting on principal adverse impacts. The process for taking into account PAIs as applied from 1 January 2023 is detailed below. In 2022, all investments of the sub-fund were screened against the Minimum Standards to avoid or reduce principal adverse impacts when investing.

The PAIs have been taken into account in the second phase of the investment process (negative impact, consisting of three steps), both as part of the initial screening and the continuous monitoring of investments:

1. Negative screening: Every (potential) investee has been screened for involvement in controversial business activities. If an investee exceeded the threshold below, “high concern” was concluded, and the investee was excluded from investment.

Triodos controversial activity	SFDR PAI	Threshold
Controversial weapons	14 (Exposure to controversial weapons)	Any involvement
Fossil fuels	4 (Exposure to companies active in the fossil fuel sector)	GICS Energy Sector classification (i.e. companies active in the fossil fuel sector)
Hazardous substances	E9 (Investments in companies producing chemicals)	Pesticides – production, distribution (>5% revenue) Persistent Organic Pollutants – production, use (>0% revenue)

2. Controversies: Every (potential) investee has been assessed on violations of UN Global Compact and OECD Guidelines for Multinational Enterprises on a case-by-case basis considering violations in the last three years. Per case, the verification of information, severity and company response were considered to conclude if a case was low, medium or high concern. In case a company had been involved in severe and/or

frequent violations without taking credible remediation measures, “high concern” was concluded, and the investee was excluded from investment.

Triodos assessment	SFDR PAI	Threshold
Controversies	<p>10 (Violations of UN Global Compact principles and OECD Guidelines)</p> <p>11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines)</p> <p>S7 (Incidents of discrimination)</p> <p>S14 (Number of severe human rights issues and incidents)</p> <p>S16 (Cases of insufficient action with breaches of anti-corruption)</p> <p>S17 (Convictions and fines for anti-corruption)</p>	Significant violations of UN Global Compact or OECD Guidelines within the last 3 years

- ESG assessment: By combining our proprietary materiality map, highlighting material ESG issues per industry, with an understanding of the company’s actual business activities, the risk that an investee inflicts negative impacts on these ESG issues has been assessed. Based on the risk classification (low, medium or high risk), the company must have met additional requirements such as having sustainability programs, reporting, certifications, policies or practices in place. In case a company did not meet these requirements but was in transition, it was flagged for engagement. The PAI indicators were considered on an absolute basis, over time and compared to five peers (where relevant). Taking all of the above into consideration, a company’s practices were assessed as low, medium or high concern. If “high concern” was concluded, the investee was excluded from investment.

Triodos			
ESG issue		SFDR PAI	Threshold
Environmental	Climate change	1 (GHG emissions) 2 (Carbon footprint) 3 (GHG intensity) 5 (Share of non-renewable energy consumption and production) 6 (Energy consumption intensity) E4 (Companies without carbon reduction initiatives) E5 (Energy consumption per non-renewable energy source)	High risk for climate change without GHG emissions reporting and Paris-aligned reduction targets; Significant controversies
	Water	E6 (Water usage and recycling) E7 (Investments in companies with-out water management policies) E8 (Exposure to areas of high water stress)	High risk for water scarcity without activities to reduce freshwater use; Significant controversies
	Waste	E13 (Non-recycled waste ratio)	Significant controversies
	Pollution	8 (Emissions to water) 9 (Hazardous and radioactive waste ratio) E2 (Emissions of air pollutants)	Significant controversies
	Ecosystems	7 (Activities negatively affecting biodiversity) E11 (Companies without sustainable land/agriculture practice) E12 (Companies without sustainable oceans/seas practice) E15 (Deforestation)	High risk for human rights or conflict minerals without relevant policy and practices; Significant controversies
	Social	Human rights & community	S9 (Lack of human rights policy) S10 (Lack of human rights due diligence)
Labour practices		S1 (Companies without workplace accident prevention policies) S2 (Rate of accidents) S3 (Numbers of days lost to injuries, accidents, fatalities or illness) S4 (Lack of supplier code of conduct) 12 (Unadjusted gender pay gap) S5 (Lack of grievance/complaints mechanism for employee matters) S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights without relevant policies, targets and monitoring; Significant controversies
Supply chain management		S12 (Operations and suppliers at significant risk of child labour) S13 (Operations and suppliers at significant risk of forced labour)	High risk for labour rights in the supply chain without relevant policies, targets and monitoring; Significant controversies
Governance		Corporate governance	13 (Board gender diversity) S8 (Excessive CEO pay ratio)
	Business ethics	S15 (Lack of anti-corruption and anti-bribery policies) S6 (Insufficient whistleblower protection)	Significant controversies

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

All investments made in 2022 were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Prior to being selected for investment and for the entire duration of the investment, (potential) investees are screened for compliance with the Minimum Standards. The Minimum Standards are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Alignment with the Minimum Standards is assessed in the second phase of the investment process through the check on controversies and the ESG assessment, based on data from external sources and additional in-house desk research (see above the answer to question 'How were the indicators for adverse impacts on sustainability factors taken into account?'). In case of significant violations of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (i.e. having severe impact, recurrence of incidents, lack of risk management and inadequate remediation measures), the investee is excluded from investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered all PAIs on sustainability factors referred to in the tables above. Every potential investment has been assessed using the relevant policies and if an issuer was found to cause significant harm, it was excluded from investment. PAIs have been continuously monitored to ensure the sub-fund remained compliant with our policies.

In 2022, continuous monitoring led to one company (Adecco) being excluded from the Triodos SICAV I investable universe due to an acquisition with involvement in weapons (relating to PAI indicator: Exposure to controversial weapons).

The engagement efforts with investee companies aimed at minimising principal adverse impacts were focused on the PAI indicators related to greenhouse gas emissions, companies producing chemicals and excessive CEO pay ratio.

The list includes the investments constituting the greatest proportion of investments of the financial during the reference period which is: 2022

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
PowerSchool Holdings	Software publishing	4.1	United States
SIG Combibloc Group	Manufacture of other articles of paper and paperboard	3.9	Switzerland
Fisher & Paykel Healthcare Corporation	Manufacture of medical and dental instruments and supplies	3.8	New Zealand
Hologic	Manufacture of medical and dental instruments and supplies	3.8	United States
Kerry Group	Manufacture of food products	3.8	Ireland
Lion Corporation	Manufacture of household and sanitary goods and of toilet requisites	3.8	Japan
Royal DSM	Manufacture of other chemical products	3.7	Netherlands
Amsterdam Commodities	Wholesale on a fee or contract basis	3.6	Netherlands
Ebro Foods	Manufacture of other food products;	3.5	Spain
Gen Digital	Other information service activities	3.5	United States
Sanoma Corporation	Publishing of books, periodicals and other publishing activities	3.5	Finland
Stride	Primary education	3.5	United States
Cooper Companies	Manufacture of medical and dental instruments and supplies	3.3	United States
Mueller Water Products	Manufacture of other taps and valves	3.1	United States
Reliance Worldwide	Manufacture of other fabricated metal products	3.0	Australia

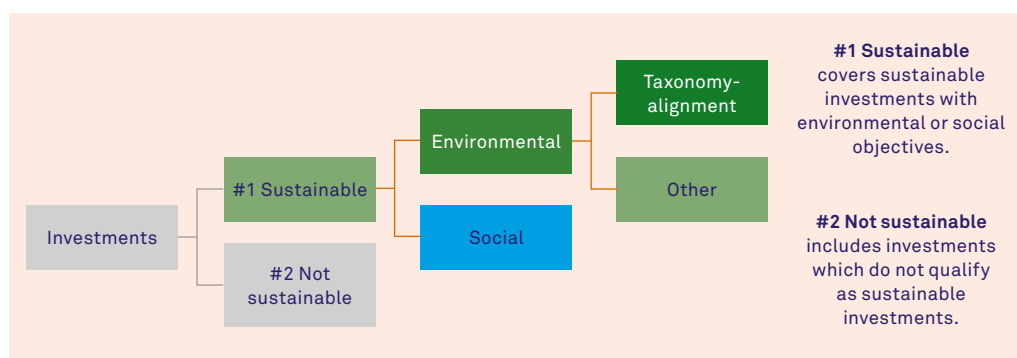

Source (Sector): NACE5

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.5% of the net assets of the sub-fund were invested in sustainable investments as per 31 December 2022.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

In which economic sectors were the investments made?

The sub-fund was launched 31 March 2022, so all investments were new in the year 2022.

The investments have been done across sectors related to:

- Other software publishing
- Water collection, treatment and supply
- Manufacture of macaroni, noodles, couscous and similar farinaceous products
- Manufacture of household and sanitary goods and of toilet requisites
- Manufacture of medical and dental instruments and supplies
- Manufacture of ceramic sanitary fixtures
- Construction of utility projects for electricity and telecommunications
- Manufacture of pharmaceutical preparations
- Manufacture of other food products n.e.c.
- Manufacture of other chemical products n.e.c.
- Manufacture of household and sanitary goods and of toilet requisites
- Wireless telecommunications activities
- Manufacture of other taps and valves
- Other human health activities
- Manufacture of tubes, pipes, hollow profiles and related fittings, of steel
- Wireless telecommunications activities
- Manufacture of corrugated paper and paperboard
- Manufacture of sports goods
- Manufacture of fluid power equipment
- Manufacture of basic pharmaceutical products
- Production of electricity

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Through investments that contribute to the Sustainable Mobility and Infrastructure, Renewable Resources and Innovation for Sustainability transition themes, the sub-fund contributes to the following environmental objectives as set out in article 9 of the EU Taxonomy:

- climate change mitigation (2.1%)
- climate change adaptation (0%)

As per 31 December 2022, 2.1% of the investments were Taxonomy aligned. The sub-fund did not have any sovereign exposures.

The Taxonomy percentages shown in the graphs below have not been subject to an assurance by an auditor or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas
- In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As at 31 December 2022, the sub-fund invested 0% of its investments in enabling activities and 0% in transitional activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

As the reporting on Taxonomy alignment is only in place since this year, a comparison with the Taxonomy alignment figures of the previous reporting period will only be available in the annual report over 2023.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 92.8% as at 31 December 2022.

We do not steer on the percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. The Triodos transition themes, which are used for the positive selection of the investments, encompass more environmentally sustainable economic activities than currently covered by the EU Taxonomy. Presently, the EU Taxonomy focusses on certain sectors only, whereas the Triodos transition themes are sector-agnostic. The percentage of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is likely to decrease over time as the remaining four Taxonomy objectives are finalised and more economic activities are added to the Taxonomy.

What was the share of socially sustainable investments?

The share of sustainable investments contributing to a social objective was 66.4% as at 31 December 2022.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The sub-fund held 4.5% of its net assets in cash and cash equivalents as ancillary liquidity. Cash and cash equivalents did not affect the delivery of the sustainable investment objectives of the sub-fund on a continuous basis. Firstly, they were used - in limited proportion - to support the proper liquidity management of the sub-fund. Secondly, the Management Company assessed on a regular basis whether counterparties for cash and cash equivalents comply with the four pillars of the UN Global Compact, using data from a third-party provider. These four pillars consist of 1) human rights, 2) labour rights 3) environment and 4) anti-corruption. Also, the Management Company assessed its counterparties' policies and sustainability performance.

What actions have been taken to attain the sustainable investment objective during the reference period?

In addition to investing in companies that contribute to child wellbeing, the sub-fund has started to work on an engagement project focused on family-friendly work policies. Execution of the project will start in 2023 with the aim to put this specific topic higher on the agenda of the companies the sub-fund invests in. This engagement project contributes to the sustainable investment objective, because it has been shown that working conditions of parents affect the health, development and overall wellbeing of children.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Management and administration

Registered office

11-13, Boulevard de la Foire
L-1528 Luxembourg
Grand Duchy of Luxembourg

Board of Directors

G.R. Pieters

Chair

Partner of the Directors' Office Luxembourg

Garry Pieters is an ILA (Institut Luxembourgeois des Administrateurs)-certified director. In addition to his role as Chairman, he coordinates the handling of complaints. Garry Pieters is a Board Member of several other Luxembourg investment entities. He has over 35 years of experience in the field of finance, in particular with ING Group N.V. He was fund manager for a number of ING Group's Luxembourg money market and fixed income funds and was Chief Executive Officer of NN Investment Partners Luxembourg S.A. and of its Singapore joint venture, as well as Executive Vice President of its Korean joint venture. He is also Chair of the Board of Triodos SICAV II. As at 31 December 2022, Garry Pieters did not hold any shares in the sub-funds of Triodos SICAV I.

M.D. Bachner-Bout

Independent, Founder Bachner Legal

Monique Bachner-Bout is an Independent Director and lawyer with broad governance, legal, technology and financial services expertise. She holds both law and economics degrees, and is an ILA Certified Director and INSEAD IDP-C. Having started her career as a Magic Circle corporate lawyer, Monique Bachner-Bout now focuses on governance and innovation, and in particular their intersection with legal and regulatory frameworks. She is the author of various corporate governance and technology governance articles and guidance, and is active in international working groups related to corporate governance, decentralisation, automation/artificial intelligence governance and ethics, and is a regular speaker on these topics. Monique Bachner-Bout is also a Member of the Board of Triodos SICAV II. As at 31 December 2022, Monique Bachner-Bout did not hold any shares in the sub-funds of Triodos SICAV I.

D.J. van Ommeren

Managing Director and Chair, Triodos Investment Management B.V.

Dirk Jan van Ommeren is Managing Director at Triodos Investment Management B.V. He has a long-standing experience in the financial sector. He previously worked

at ABN AMRO MeesPierson, where he was Managing Director Marketing & Products and member of the management group of ABN AMRO Bank. W. de Vries
Fund Manager Triodos Sterling Bond Impact Fund
(until 31 December 2022) and Director Impact Equities & Bonds (IE&B)

William de Vries has been Director of Triodos IM Impact Equities and Bonds since February 2020. He joined Triodos IM in 2017 as Fund Manager Triodos Euro Bond Impact Fund and has since been promoted to Director of the department. William brings over 30 years of experience in the industry. Prior to Triodos, William spent nearly 10 years at Kempen Capital Management as Head of Core Fixed Income and held several portfolio management and director positions at Philips Pension Fund, Merrill Lynch Investment Managers and BlackRock. William holds a Master's degree in International Economics from Tilburg University (1989), is a certified CEFA (VBA) analyst and is registered with the Dutch Securities Institute as an Institutional Investment Advisor.

R. Veltmeijer
Fund Manager Triodos Sterling Bond Impact Fund
(as from 1 January 2023)

Rosl Veltmeijer is Fund Manager of Triodos Sterling Bond Impact Fund and Portfolio Manager for Triodos IM's discretionary mandates. In the latter role she is responsible for the fixed income impact investments in the discretionary portfolios of Triodos Private Banking. She joined Triodos in 2001 as an analyst, and in 2002 she became the firm's Head of Research for listed equity and bond investments, specialising in sustainability assessments. She served in this position until September 2017, when she took over the role of Portfolio Manager. Rosl holds a Bachelor's degree in Business Economics from Fontys Eindhoven, a

Master's degree in Social Banking and Social Finance from the University of Plymouth and a Master's degree in Investment Management from Vrije Universiteit Amsterdam (RBA). She is a member of the Dutch Fund and Asset Management Association (DUFAS) Sustainability Committee and associate for the Institute for Social Banking. Rosl is registered with the Dutch Securities Institute as a Retail Investment Advisor.

Triodos Impact Mixed Fund - Defensive, Neutral, Offensive

R. van Boeijen

Fund Manager Triodos Impact Mixed Funds

Rob van Boeijen joined Triodos Investment Management in 2017 in a private banking role. Rob has been associated with investment management for Triodos Bank Private Banking since 2008 when he joined Triodos MeesPierson Investment Management. Rob started his professional career as an equity analyst and portfolio manager for GAK Pension funds in 1990. He acted in several roles in investment research and institutional account management with ABN AMRO, Barclays, Metzler, Theodoor Gilissen and State Street. Rob holds a Master's degree in Business Administration from the University of Amsterdam (1988) and is a certified VBA financial analyst. Rob is registered with the Dutch Securities Institute as an Institutional Investment Advisor.

Triodos Pioneer Impact Fund

D. Hoozemans

Fund Manager Triodos Pioneer Impact Fund (until 30 June 2022) and Fund Manager Triodos Global Equities Impact Fund a.i. (January 2022)

Dirk Hoozemans joined Triodos Investment Management in 2017 as Fund Manager of Triodos Pioneer Impact Fund. He joined from Robeco where he served in various portfolio management positions in Rotterdam, Boston and Hong Kong, including portfolio manager of the Robeco Global Energy fund and deputy portfolio manager of the Robeco NV fund. Dirk holds a Master's degree in Econometrics from Tilburg University (2000), is a CFA Charterholder, holds the CFA institute Certificate in ESG Investing and is registered with the Dutch Securities Institute as an Institutional Investment Advisor.

D. Willems

Fund Manager Triodos Pioneer Impact Fund (as from 15 August 2022)

Dimitri Willems has been Fund Manager of Triodos Pioneer Impact Fund since August 2022. Prior to joining Triodos, he held several positions as portfolio and investment manager, most notably as Senior Portfolio Manager at Kempen Capital Management for over 13 years and ING Investment Management for over 8 years. Dimitri started his career in the investment industry in 1998 at MN Services. He holds a Master's degree in Business Economics from the Erasmus University Rotterdam (1996) and is a CFA Charterholder. He is registered with the Dutch Securities Institute as an Institutional Investment Advisor.

Triodos Future Generations Fund

S. Rozing

Fund Manager Triodos Future Generations Fund and Fund Manager Triodos Pioneer Impact Fund a.i. (July 2022 until 14 August 2022)

Sjoerd Rozing has been Fund Manager of Triodos Future Generations Fund since March 2022. He joined Triodos Investment Management in 2017 as an investment analyst. In this role, he covered global equities. Prior to Triodos, Sjoerd worked at Teslin Capital Management where he was responsible for investment analysis of European small caps. Sjoerd holds a Master's degree in Business Studies from the University of Amsterdam (2008) and earned a CFA charter in 2011. He also served on the board of CFA VBA Society Netherlands until December 2017. Sjoerd is registered with the Dutch Securities Institute as an Institutional Investment Advisor.

Labels and awards

Triodos Investment Management

Environmental Finance is a key source of information for responsible investors seeking ways in which to support projects that mitigate climate change or make a positive impact.

The Sustainable Investment Awards seek to recognise asset managers, analysts and data providers incorporating ESG across all asset classes: fixed income, listed and private equity, debt funds, multi

asset funds, infrastructure funds and fund of funds. Triodos Investment Management is the proud winner of the 2021 Environmental Finance Sustainable Investments Awards for 'Listed equities manager of the year'.

The Impact Awards seek to recognise the work of impact investors and highlight emerging pockets of best practice, across all asset classes and geographies.

Triodos Investment Management is the proud winner of the 2021 Environmental Finance Impact Awards for 'Best impact measurement/impact reporting'.

All Triodos SICAV I sub-funds

Tracing its roots to the European Transparency Guidelines unveiled in 2004, the European SRI Transparency Code, first launched in May 2008, primarily aims at increasing accountability and clarity of SRI practices for European investors. The principle driving the Code is that asset manager signatories should be open and honest, and disclose accurate, adequate and timely information to enable stakeholders, in particular retail investors, to understand the policies and practices of a given SRI fund. The Code focuses on SRI funds distributed publicly in Europe and has been designed to cover a range of asset classes.

Triodos Euro Bond Impact Fund, Triodos Global Equities Impact Fund, Triodos Impact Mixed Funds and Triodos Pioneer Impact Fund

Towards Sustainability is an initiative from Febelfin, the Belgian federation for the financial sector. The quality standard aspires to increase the level of socially responsible and sustainable financial products, and to mainstream its principles towards traditional financial products. The label reassures investors that the financial product is managed with sustainability in mind and is not exposed to very unsustainable practices.

The Triodos IM Impact Equities and Bonds funds have been awarded the rigorous Label ISR, which is supported by the French government. On top of Triodos IM's mission for positive impact, the label rewards each of the six funds available on the French market for their thorough integration of ESG criteria in their investment process.

The Nordic Swan Ecolabel is a renowned consumer sustainability label in the Nordic countries. The Nordic Swan Ecolabel provides investors with confidence that their money is invested in alignment with their sustainability goals and expectations. Nordic Swan Ecolabeled funds must fulfil 25 obligatory requirements including intentional inclusion of sustainable and exclusion of unsustainable companies, leading transparency and active ownership (voting and direct dialogue). Read more about the Nordic Swan label on www.svanen.se/en/funds.

The FNG (Forum Nachhaltige Geldanlagen) label is the leading quality standard for sustainable investment funds in the German speaking market. High quality sustainable funds that score above

average with regards to institutional credibility, product standards and impact (selection process, engagement and KPIs) can obtain a maximum score of three stars, following an independent due diligence and intensive sparring.

Triodos Pioneer Impact Fund

Triodos Pioneer Impact Fund is the proud winner of the 2021 Environmental Finance Impact Awards for 'Fund of the year – listed equity'.

Impact Investing Award 2021 - Public Funds

Triodos Pioneer Impact Fund was also the winner of Financial Investigator's 2021 Impact Investing Award in the category 'Public Funds'.

Triodos Global Equities Impact Fund, Triodos Sterling Bond Impact Fund and Triodos Pioneer Impact Fund

The three Triodos IM Impact Equities and Bonds Funds available in the UK have been awarded the renowned 3D Investing label. Triodos Pioneer Impact Fund received the highest possible ranking.

The 3D Investing Accreditations provide an extensive evidence-based audit, offering an independent verification of a fund or company's responsible investment credentials and credibility. The 3D Impact Rating is an additional rating

for certified funds that meet a minimum threshold for positive social and environmental impact.

ADDITIONAL INFORMATION ON FACILITIES FOR GERMAN INVESTORS

For the following sub-funds of Triodos SICAV I no notification for distribution in the Federal Republic of Germany was submitted and shares in these sub-funds may NOT be offered to investors within the scope of the German investment law. As a consequence, the following sub-funds are NOT available to investors in Germany:

TRIODOS STERLING BOND IMPACT FUND

In accordance with Article 93(1) of Directive 2009/65/EC, find hereafter information on the facilities to perform the tasks referred to in Article 92(1) of this Directive:

- **Process subscriptions, repurchase and redemption orders and make other payments to unit-holders relating to the units of the UCITS**

Subscriptions, repurchase and redemption orders can be addressed to RBC Investor Services Bank S.A. in Luxembourg having its registered address at 14, Porte de France, L-4360 Esch-sur-Alzette

Payments relating to the units of the UCITS will be made by RBC Investor Services Bank S.A. in Luxembourg having its registered address at 14, Porte de France, L-4360 Esch-sur-Alzette

- **Provide investors with information on how orders can be made and how repurchase and redemption proceeds are paid**

Information on how orders can be made and how repurchase and redemption proceeds are paid can be obtained from RBC Investor Services Bank S.A. in Luxembourg having its registered address at 14, Porte de France, L-4360 Esch-sur-Alzette or from Triodos Bank N.V. Deutschland, Falkstraße 5, 60478 Frankfurt am Main (the information agent)

- **Facilitate the handling of information and access to procedures and arrangements referred to in Article 15 of Directive 2009/65/EC relating to investors' exercise of their rights**

Information can be obtained from:
Triodos SICAV I
Attention: Complaints Handling Officer
11-13, Boulevard de la Foire
L-1528 Luxembourg
Grand Duchy of Luxembourg
E-mail address: TriodosIM@triodos.com

- **Make the information and documents required pursuant to Chapter IX of Directive 2009/65/EC available to investors**

Information can be obtained from RBC Investor Services Bank S.A. in Luxembourg having its registered address at 14, Porte de France, L-4360 Esch-sur-Alzette or from Triodos Bank N.V. Deutschland, Falkstraße 5, 60478 Frankfurt am Main (the information agent).

Communications to investors will generally be published on www.triodos.de. In addition to publication on www.triodos.de, investor notices will be sent to the shareholders in Germany in the following cases:

- suspension of the redemption of the shares,
- termination of the management of the Company or liquidation of the Company,
- any amendments to the Company rules which are inconsistent with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- merger of the Company with one or more other funds and
- the change of the Company into a feeder fund or the modification of the master fund.

The latest issue, sale, repurchase or redemption price of the units is available at the registered office of the Fund, on the website www.triodos.de.

No shares of the Company will be issued as printed individual certificates.
